Overview

At S&P Global Sustainability Research, we have always believed that financial analysis is incomplete if it ignores material extra-financial factors. Sustainability trends such as resource scarcity, climate change or an aging population continuously reshape a company's competitive environment. We are convinced that companies that can adapt to such challenges in material topics through innovation, quality and productivity enhance their ability to generate long-term enterprise value. S&P Global Sustainable1 defines a sustainability issue as material if it presents a significant impact on society or the environment and a significant impact on the company's value drivers, competitive positioning, and long-term shareholder value creation. The annual Corporate Sustainability Assessment (CSA) was developed more than 20 years ago in order to identify companies that are better equipped to recognize and respond to emerging sustainability opportunities and challenges presented by global and industry trends.

We pursue a truly integrated approach to analyzing sustainability performance. An interdisciplinary team of analysts designs, monitors and refines the CSA with the purpose of generating additional insights into the value-creating and risk-mitigating potential of companies, ensuring that the assessment focuses on sustainability criteria that are materially relevant to corporate performance, valuation and security selection.

Not only does this make the results of the CSA assessment particularly relevant for investors, but it also helps companies to focus on sustainability issues that are more directly linked to their success as a business.

The CSA's approach is also unique in that it is based on information provided by the companies directly through the online questionnaire. This allows us to analyze sustainability at a much deeper level than frameworks based on public disclosure alone.

We are often asked how the CSA works and how the information provided is used to calculate the S&P Global CSA Score, a key component of the S&P Global ESG Score. This paper seeks to offer some insights into how the questionnaire is structured, how the score is calculated, and by using examples from three different industries, how specific questions can have an impact on a company's S&P Global CSA Score.

CSA at a Glance

- Since 1999, the annual Corporate Sustainability Assessment (CSA) has been conducted to serve as the framework for measuring corporate sustainability performance.
- As of March 2026, S&P Global produced 2025 ESG Scores for around 13,000 companies. These companies were selected to be assessed based on their market relevance and to ensure consistency in coverage over time. Each year, S&P Global invites all companies that will receive a public ESG Score to participate in the assessment process. The S&P Global Invited Universe is generally comprised of:
  - Companies that are eligible for the Dow Jones Best in Class Indices. The underlying rules can be found here: https://www.spglobal.com/spdji/en/index-family/sustainability/sustainability/#indices
  - Companies that form part of S&P Dow Jones Indices benchmark indices. The underlying rules can be found here: https://www.spglobal.com/spdji/en/methodology/article/sp-esg-index-series-methodology/
    S&P Global regularly evaluates its universe of assessed companies so that it stays relevant to the needs of the investment community, for example using the S&P Global Broad Market Index and market capitalization as a reference [1].
- 62 industries derived from the Global Industry classification system (GICS).
- No industries are excluded from the assessment
- Companies are evaluated based on materially relevant sustainability criteria covering the economic, environmental and social dimensions.

概述

在标普全球可持续发展研究，我们始终认为，如果财务分析忽视了实质性非财务因素，那它就是不完整的。资源稀缺、气候变化或人口老龄化等可持续发展趋势不断重塑公司的竞争环境。我们深信，能够通过创新、质量和生产力在实质性议题上应对此类挑战的公司，将增强其创造长期企业价值的能力。标普全球Sustainable1将一项可持续发展议题定义为实质性议题，前提是它对社会或环境产生重大影响，并对公司的价值驱动因素、竞争定位和长期股东价值创造产生重大影响。年度企业可持续发展评估（CSA）于20多年前制定，旨在识别那些更有能力认识和应对全球及行业趋势所带来的新兴可持续发展机遇与挑战的公司。

我们采用真正整合的方法来分析可持续发展绩效。由分析师组成的跨学科团队设计、监测并完善CSA，旨在对企业创造价值和缓解风险的潜力产生更多洞察，确保评估聚焦于对企业绩效、估值和证券选择具有实质性相关性的可持续发展标准。

这不仅使 CSA 评估的结果与投资者尤为相关，还帮助企业聚焦于与其商业成功关系更为直接的可持续发展议题。

CSA 的方法还有一个独特之处，即它基于企业通过在线问卷直接提供的信息。这使我们能够比仅依赖公开披露的框架更深入地分析可持续发展。

我们经常被问到CSA如何运作，以及所提供的信 息如何被用于计算标普全球CSA评分——这是标普全球ESG评分的一个关键组成部分。本文旨在提供一些见解，说明问卷是如何构建的、得分是如何计算的，并通过来自三个不同行业的示例，说明特定问题如何对公司的标普全球CSA评分产生影响。

CSA概览

- 自1999年以来，年度企业可持续发展评估（CSA）一直作为衡量企业可持续发展绩效的框架。
- 截至2026年3月，标普全球为约13,000家公司生成了2025年ESG评分。这些公司是基于其市场相关性和确保覆盖范围随时间保持一致而被选中进行评估的。每年，标普全球邀请所有将获得公开ESG评分的公司参与评估流程。标普全球受邀范围通常包括：
  - 有资格纳入道琼斯最佳类别指数的公司。相关规则可参见：https://www.spglobal.com/spdji/en/index-family/sustainability/sustainability/#indices
  - 构成标普道琼斯指数基准指数成分股的公司。相关规则可参见：https://www.spglobal.com/spdji/en/methodology/article/sp-esg-index-series-methodology/

    标普全球定期评估其受评公司范围，以确保其与投资界的需求保持相关，例如使用标普全球广泛市场指数和市值作为参考[1]。
- 62 行业源自全球行业分类系统（GICS）。
- 评估不排除任何行业
- 公司依据涵盖经济、环境和社会维度的实质性相关可持续发展标准进行评估。

Measuring Sustainability Performance

- Companies receive a S&P Global ESG Score between 0–100 and are ranked against other companies in their industry. The S&P Global ESG Score measures a company sustainability performance informed by a combination of company disclosures, media and stakeholder analysis, modelling approaches and in-depth company engagement via the CSA.
- The CSA identifies sustainability leaders across all industries, enabling investors to track their performance and integrate sustainability considerations into their portfolios.

[1] S&P Global may add additional, currently non-invited companies to the broader Research Universe. Moreover, non-invited issuers (I.e., individual companies) have the option to solicit a Corporate Sustainability Assessment and obtain an S&P Global ESG Score.
Invited Universe: determined by a Rules-based approach. A list of companies for which S&P Global S1 is going to perform a Corporate Sustainability Assessment (CSA) on and produce ESG scores on a regular basis. These companies will be actively contacted ("invited") to contribute to the assessment process. The Invited universe always refers to a specific methodology year.
Research Universe: All companies for which S&P Global S1 is going to perform a Corporate Sustainability Assessment (CSA) and produce ESG scores, irrespective of their invitation status. This can include companies that are not part of the Invited Universe. The Research Universe always refers to a specific methodology year.

Sustainable1

衡量可持续发展绩效

- 公司会获得一个介于0–100之间的标普全球ESG评分，并与其所在行业的其他公司进行排名比较。标普全球ESG评分衡量的是公司的可持续发展绩效，其依据综合了公司披露、媒体与利益相关者分析、建模方法以及通过CSA进行的深入公司参与。
- CSA 识别各行业中的可持续发展领导者，使投资者能够追踪其绩效，并将可持续发展考量纳入其投资组合。

[1] 标普全球可能会将目前未受邀的其他公司纳入更广泛的研究范围。此外，未受邀发行人（即个别公司）可以选择申请企业可持续发展评估并获得标普全球ESG评分。受邀范围：由基于规则的方法确定。标普全球S1将定期对其进行企业可持续发展评估（CSA）并生成ESG评分的公司名单。这些公司将被主动联系（"受邀"）以参与评估流程。受邀范围始终指代特定的方法论年度。研究范围：标普全球S1将对其进行企业可持续发展评估（CSA）并生成ESG评分的所有公司，无论其受邀状态如何。这可能包括不属于受邀范围的公司。研究范围始终指代特定的方法论年度。

Focus on Double Materiality

The starting point for the CSA is our materiality framework, which draws upon more than 20 years of experience in integrating sustainability into the investment process. For each of the 62 industries evaluated through the CSA, our analysts conduct a materiality analysis to identify those sustainability factors that drive social and environmental impact as well as business value. Considering the dual nature of materiality, we pay close attention to the interrelation between external impact and internal impact on enterprise value creation. This analysis results in a materiality matrix for each industry, which serves as the basis for determining the applicability and weights of the various sustainability criteria in the CSA.

The materiality analysis considers global megatrends and industry specific value drivers that contextualizes company performance. It leverages our quantitative research, internal and external data sources, and pays due attention to both risks and opportunities closely associated with financial performance in the short, medium, and long-term.

Over time external impacts on society and environment translate into internal impact on a company itself, including its financial value drivers. These impacts may be positive or negative, direct or indirect, including ripple effects through the value chain, upstream or downstream. As such, S&P Global Sustainable1 considers double materiality as an integral part of the analysis of corporate sustainability performance. In a broader understanding of enterprise value today, including stakeholder perspectives, the interrelation between external and internal impact is a core part of determining materiality. The industry level matrices positions 22 Materiality Core Subjects to reflect their relative significance at industry level. These findings also inform our annual adjustment of criteria weighting in the CSA. An example of a hypothetical industry materiality matrix is provided in Figure 1.

Figure 1

Industry-level Materiality Matrix - Hypothetical Example

聚焦双重重要性

CSA的起点是我们的重要性框架，该框架依托20多年来将可持续发展融入投资流程的经验。对于CSA评估的62个行业中的每一个，我们的分析师都会进行重要性分析，以识别那些驱动社会与环境影响以及商业价值的可持续发展因素。考虑到重要性的双重性质，我们密切关注外部影响与对企业价值创造的内部影响之间的相互关系。该分析为每个行业生成一个重要性矩阵，作为确定CSA中各项可持续发展标准适用性及权重的依据。

重要性分析考虑全球大趋势和行业特定价值驱动因素，从而将公司绩效置于具体背景中加以审视。该分析依托我们的定量研究、内部与外部数据来源，并充分关注与短期、中期和长期财务绩效密切相关的风险与机遇。

随着时间的推移，对社会和环境的外部影响会转化为对公司自身的内部影响，包括其财务价值驱动因素。这些影响可能是正面的或负面的，直接的或间接的，包括通过价值链上下游产生的连锁效应。因此，标普全球Sustainable1将双重重要性视为企业可持续发展绩效分析中不可或缺的一部分。在当今对企业价值更广泛的理解中，包括利益相关者视角，外部影响与内部影响之间的相互关系是确定重要性的核心部分。行业层面矩阵将22个重要性核心议题定位，以反映其在行业层面的相对重要性。这些发现也为我们在CSA中每年调整标准权重提供参考。图1提供了一个假设性行业重要性矩阵的示例。

图1行业层面重要性矩阵——假设示例

A Structured Approach

The starting point for our annual corporate assessment is an industry-specific questionnaire focusing on relevant economic, environmental, and social criteria. We center attention on sustainability actions that can have an impact on companies' long-term value creation.

Calculating a company's S&P Global CSA Score is a process of applying sub-level scores which are progressively weighted and summed until a final aggregated score is reached.

The starting point consists of individual questions, the values of which are weighted, summed and aggregated into broader areas called criteria. Similarly, criteria scores are weighted, summed and aggregated into even broader areas called dimensions. Following the same pattern, dimensions values are then weighted and summed to find a maximum sustainability score. See Figure 2 for a visual overview of the process.

While each year the CSA collects fresh data on corporate sustainability practices, the reported results are supplemented with a Media and Stakeholder Analysis (MSA) that examines controversy developments which have surfaced via the media and other channels. The MSA monitors a company's sustainability performance on an ongoing basis by assessing current controversies which could have potentially negative reputational or financial impact on a company. The MSA is an additional overlay used to modify criteria scores downward based on evidence ranging from deliberate involvement and mismanagement of controversial incidents to negligent lapses in oversight (see page 7 for more detail).

For more information on the MSA process, please refer to our "MSA Methodology Guidebook".

In 2023 an additional overlay was introduced to integrate modelling into the S&P Global ESG Score. The scoring approach within the CSA allocates a '0' score to all questions where no information is disclosed to S&P Global, or where no information is found in the public domain. The outcome of this disclosure-based score is referred to as the S&P Global Corporate Sustainability Assessment (CSA) Score. To provide a more complete and holistic assessment of a company's sustainability performance, modelling approaches based on imputation are applied and aggregated into the S&P Global ESG Score to address gaps in disclosure. The purpose of this modelling approach is to emulate the performance-based scoring that could have been applied if reported data were available.

For more information on the integration of modelling into the S&P Global ESG Scores please refer to the "S&P Global ESG Scores Methodology".

结构化方法

我们年度企业评估的起点是一份行业特定问卷，聚焦相关的经济、环境和社会标准。我们将注意力集中在能够对公司长期价值创造产生影响的可持续发展行动上。

计算公司的标普全球CSA得分，是一个对子级评分逐步加权并求和的流程，直至得出最终汇总评分。

起点由各个单独的问题组成，这些问题的值经过加权、求和并汇总为更广泛的领域，称为标准。同样，标准评分经过加权、求和并汇总为更广泛的领域，称为维度。按照相同的模式，维度值再经过加权和求和，得出最高可持续发展评分。有关该流程的可视化概览，请参见图2。

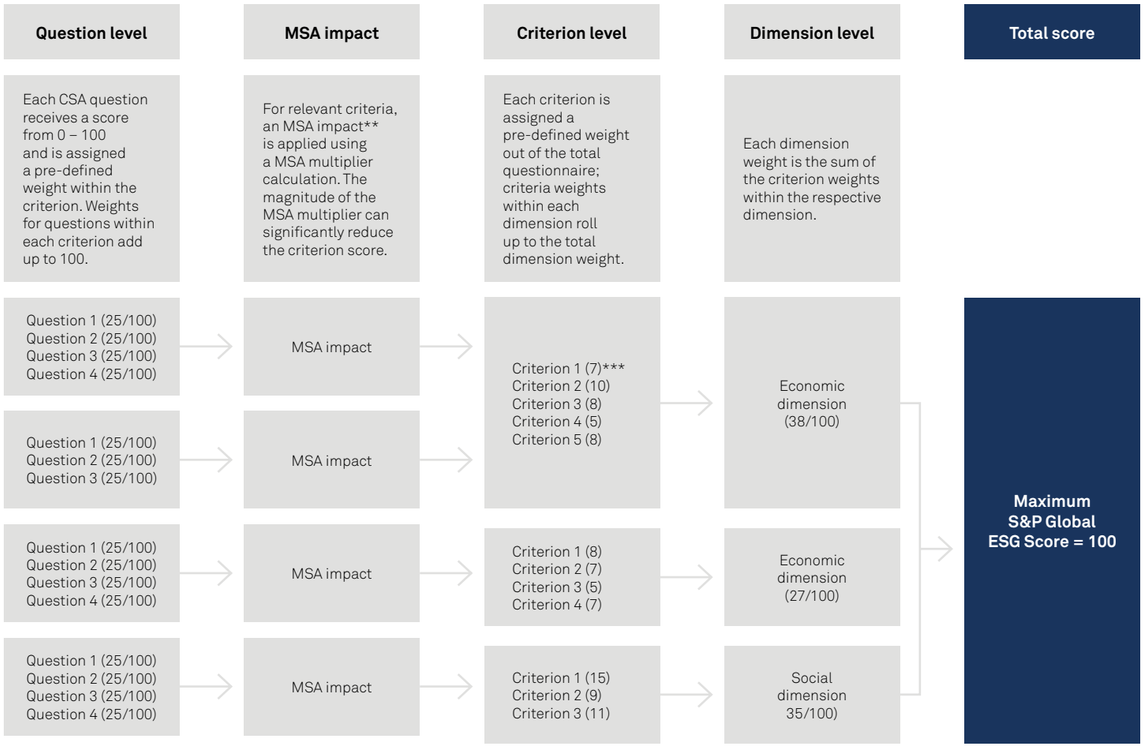

虽然CSA每年都会收集企业可持续发展实践的新数据，但所报告的结果会辅以媒体与利益相关者分析（MSA），该分析审查通过媒体和其他渠道浮出水面的争议动态。MSA通过评估当前可能对公司产生潜在声誉或财务负面影响的争议，持续监测公司的可持续发展绩效。MSA是一种额外的叠加层，用于根据从蓄意参与和不当处理争议事件到疏忽性监管失察等证据下调标准评分（更多详情请参见第7页）。

如需了解有关MSA流程的更多信息，请参阅我们的《MSA方法论指南》。

2023年，我们引入了一项额外的叠加机制，将建模整合到标普全球ESG评分中。CSA内部的评分方法对以下所有问题赋予"0"分：未向标普全球披露任何信息的问题，或未能在公共领域找到任何信息的问题。这一基于披露的评分的产出被称为标普全球企业可持续发展评估（CSA）评分。为了对公司可持续发展绩效提供更完整、更全面的评估，我们应用基于插补的建模方法，并将其汇总到标普全球ESG评分中，以弥补披露方面的缺口。此建模方法的目的是模拟在报告数据可得的情况下本可应用的基于绩效的评分。

有关将建模纳入标普全球ESG评分的更多信息，请参阅"标普全球ESG评分方法论"。

A Comprehensive Analysis With an Industry-Specific Focus

Based on major global sustainability challenges identified by our analysts at S&P Global Sustainability Research & Methodology team, general criteria relating to standard management practices and performance measures such as Corporate Governance, Human Capital Development and Risk and Crisis Management are defined and applied to each of the 62 industries. The general criteria account for approximately 40–50% of the assessment, depending on the industry.

The remaining part of the CSA is made up of industry specific risks and opportunities that focus on economic, environmental and social challenges and trends that are relevant to companies within that industry. This focus on industry-specific criteria reflects our conviction that industry-specific sustainability opportunities and risks play a key role in a company's long-term success and allows us to compare companies against their own peers in order to identify sustainability leaders. For instance, a manufacturing company's management of its exposures to climate change risks cannot be compared to a bank's response to climate change. Therefore, for industries with complex supply chains and logistics, the assessment focuses on evaluating their efforts to manage carbon emissions, whereas for financial services providers, the assessment focuses on whether companies address climate change through their financial products or by offering innovative funding schemes that encourage a transition towards a low-carbon economy.

The relative weights of the economic, environmental and social dimension of the questionnaire vary by industry. For example, as shown in Figure 3, the environmental dimension warrants a higher weighting in the Electric Utilities industry than in the Banking or Pharmaceuticals industries.

Figure 3
General versus Industry specific Weights by Dimension[4]

Source: S&P Global ESG Research

Criteria and weights are based on the 2021 CSA for Banking, Electric Utilities, and Pharmaceuticals industries and are provided for illustrative purposes only. Criteria and weights will differ for other industries. Specific criteria and their corresponding weights for subsequent years may change.

[4] For a complete overview of the criteria weights for each of the 62 industries, please refer to the Criteria Weights document in the CSA Resource Center at www.spglobal.com/esg/csa/csa-resources/csa-methodology.

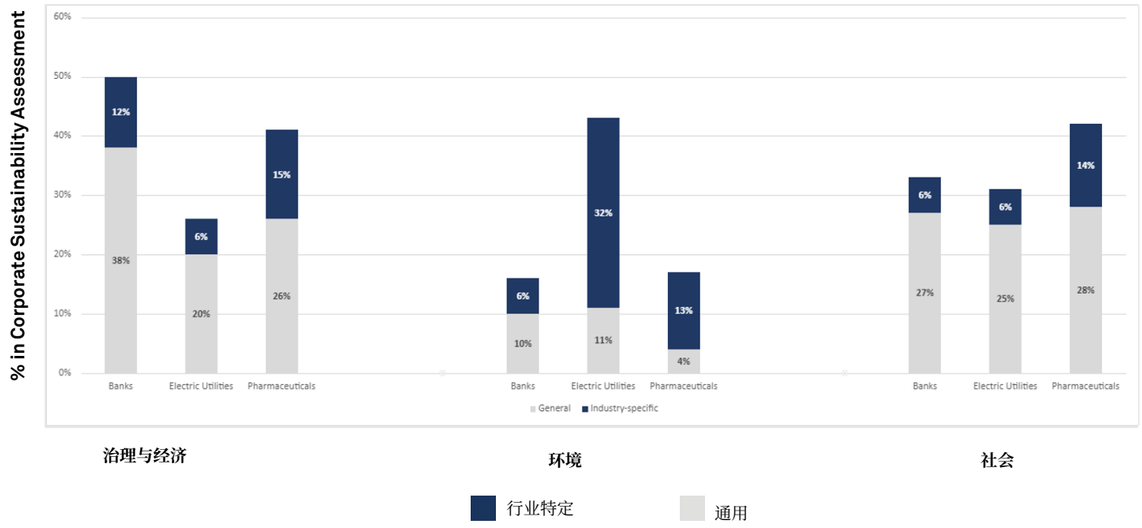

以行业特定为焦点的全面分析

基于我们标普全球可持续发展研究与方法论团队的分析师所识别的重大全球可持续发展挑战，我们定义了与标准管理实践和绩效衡量指标（如公司治理、人力资本发展以及风险与危机管理）相关的通用标准，并将其应用于全部62个行业。通用标准约占评估的40–50%，具体比例因行业而异。

CSA的其余部分由行业特定风险与机遇构成，这些风险与机遇聚焦于与该行业内公司相关的经济、环境和社会挑战及趋势。这种对行业特定标准的关注体现了我们的信念，即行业特定可持续发展机遇与风险在公司的长期成功中发挥着关键作用，并使我们能够将公司与同行进行对比，以便识别可持续发展领导者。例如，一家制造企业对其气候变化风险敞口的管理，无法与一家银行对气候变化的回应相提并论。因此，对于拥有复杂供应链和物流的行业，评估侧重于评价其在管理碳排放方面的努力，而对于金融服务提供商，评估则侧重于公司是否通过其金融产品来应对气候变化，或通过提供鼓励向低碳经济转型的创新融资方案来应对气候变化。

问卷中经济、环境和社会维度的相对权重因行业而异。例如，如图3所示，环境维度在电力公用事业行业中的权重高于银行业或制药行业。

图3
按维度划分的通用权重与行业特定权重[4]

来源：标普全球ESG研究

标准及权重基于2021年CSA中银行业、电力公用事业和制药行业的情况，仅供参考。其他行业的标准及权重将有所不同。后续年度的具体标准及其相应权重可能会发生变化。

[4] 如需全面了解全部62个行业的标准权重概览，请参阅CSA资源中心的标准权重文件：www.spglobal.com/esg/csa/csa-resources/csa-methodology。

Criteria within the questionnaire will vary from industry to industry to reflect industry-specific drivers, as shown in Figure 4, which provides a comparison of the criteria applied to the Banks, Electric Utilities and Pharmaceuticals industries.

Moreover, certain criteria — even when applied to more than one industry — can have different weights within the CSA. For example, the Banks, Electric Utilities and Pharmaceuticals industries each contain the "Climate Strategy" criterion within the Governance and Economic Dimension of their respective questionnaires, but the relative weight assigned to Climate Strategy is 8%, 8%, and 2%, respectively. These differences stem from S&P Global Sustainability Research & Methodology analysts' fundamental bottom-up analysis of each industry. While "Climate Strategy" is more relevant for Banks' product portfolios and Electric Utilities' own operations, the focus for Pharmaceuticals is placed on the other dimension criteria. Furthermore, the same criterion, when applied to different industries, may contain a slightly different set of questions to reflect industry-specific issues.

Figure 4

问卷中的标准因行业而异，以反映行业特定的驱动因素，如图4所示，该图对比了适用于银行、电力公用事业和制药行业的标准。

此外，某些标准——即使适用于多个行业——在CSA中也可能具有不同的权重。例如，银行、电力公用事业和制药行业各自的治理与经济维度中都包含"气候战略"标准问卷，但气候战略的相对权重分别为8%、8%和2%。这些差异源于标普全球可持续发展研究与方法分析师对每个行业的基本面自下而上分析。虽然"气候战略"对银行的产品投资组合和电力公用事业自身的运营更为相关，但制药行业的重点则放在其他维度标准上。此外，同一标准在应用于不同行业时，可能包含略微不同的问题集，以反映行业特定的问题。

What Is S&P Global ESG Research Looking For?

In line with our conviction at S&P Global Sustainability Research that material nonfinancial factors contribute to better informed investment decisions, the methodology focuses on long-term sustainability factors that are relevant to each industry, material to the company's financial performance and under-researched in conventional financial analysis. Within each criterion, we look for evidence of a company's awareness of sustainability issues and for indications that it has implemented strategies to address them. We also evaluate the company's progress in implementing such strategies as well as the quality of its reporting on these issues. Therefore, the questions within each criterion are structured to capture and evaluate the following elements:

- Awareness of the importance of these factors to its financial success
- Determination of the potential impact in business value as well as social and environmental impact
- Implementation of strategies to manage these sustainability risks or to capitalize on related opportunities in a manner that is consistent with its business models
- Measurement of results in relation to stated Key Performance Indicators (KPI) in order to evaluate the effectiveness of its sustainability strategy
- Validation or external audit of stated results
- Transparent communication of its corporate sustainability strategies and extent to which stated targets have been met

This framework for evaluating corporate sustainability performance enables S&P Global Sustainability Research to develop a more robust understanding of a company's quality of management.[5]

Scoring the Questions

The questionnaire is designed to be objective and uses predefined scoring approaches in which each potential answer is assigned a number of points between 0–100.

For many questions, companies will only receive the maximum score for the question if they have provided adequate supporting material. And for some questions points will only be awarded if information covering the question requirements is publicly available. In the following pages, we provide examples of specific questions from the Pharmaceuticals and Banking industries, and show how a company's response to these questions has an impact on the S&P Global CSA Score.

What 标普全球ESG研究在寻找什么?

我们在标普全球可持续发展研究秉持这样的信念：重大非财务因素有助于做出更明智的投资决策。因此，该方法论聚焦于与各行业相关的长期可持续发展因素，这些因素对公司的财务绩效具有重大影响，且在传统财务分析中研究不足。在每个标准中，我们寻找证据以判断公司是否意识到可持续发展议题，并寻找其已实施战略以应对这些议题的迹象。我们还评估公司实施此类战略的进展，以及其对这些议题报告的质量。因此，每个标准内的问题设计旨在捕捉并评估以下要素：

- 对这些因素对其财务成功重要性的认识
- 确定对商业价值以及社会与环境影响的潜在影响
- 实施相关战略，以与其商业模式相一致的方式管理这些可持续发展风险或利用相关机遇
- 对照所声明的关键绩效指标（KPI）衡量结果，以评估其可持续发展战略的有效性
- 对所声明结果进行验证或外部审计
- 透明沟通其企业可持续发展战略以及所声明目标的实现程度

这一评估企业可持续发展绩效的框架使标普全球可持续发展研究能够更深入地了解公司的管理质量。[5]

问题评分

问卷设计力求客观，采用预设的评分方法，每个可能答案被赋予0至100之间的分数。

对于许多问题，公司只有在提供了充分的支持材料后才能获得该问题的最高得分。而对于某些问题，只有当涵盖问题要求的信息可公开获取时才会被授予分数。在接下来的页面中，我们提供了来自制药和银行业的具体问题示例，并展示公司对这些问题的回应如何影响标普全球CSA评分。

Example 1

Pharmaceuticals

Question: Access to Healthcare Programs (Products & Drugs)	Does the company have programs to improve the accessibility of healthcare products and drugs and are they available publicly?
Question Points	0–100
Question weight within criterion	15%
Criterion	Contribution to Societal Healthcare
Dimension	Social
CSA Rationale	Underprivileged patients in developed as well as developing countries often face financial constraints to accessing the medication and treatment crucial to cure their diseases. Sustainability leaders in the pharmaceutics and biotech industries are taking innovative steps to engage with these social issues by providing underprivileged patients access to drugs and products. In turn, these companies benefit from the opportunity to expand their own credibility, their corporate and product brands, and the market penetration of their products and services. Our questions focus on the measures that companies take to increase the accessibility of drugs in both developing and developed countries.

Possible Answers	Number of Points Awarded
A. List of potential approaches (company can check all that apply)	0–100 (depending on which approaches have been selected)
B. Not applicable	A question that has been marked "Not Applicable" will not be scored and the weight of the question will be equally redistributed across the other questions within the same criterion, only if the analyst agrees that the question does not apply to the company's business model. This option is only granted in exceptional cases.
C. Not known	0

[5]To learn more about the methodology used in the Corporate Sustainability Assessment, please refer to the CSA Handbook, which provides additional detail on the rationale and structure for the general and cross-industry criteria in the CSA. The CSA Handbook can be accessed at the CSA Resource Center at www.spglobal.com/esg/csa/csa-resources/csa-methodology.

Assuming the company receives 50 points for its response to this question, its score will be calculated as follows:

Number of Points Received		Question Weight (within the criterion)		Criterion Weight (within questionnaire)		Question Score =
(between 0 and 100)	X	15/100 =	X	14/100 =	=	1.05 of S&P Global CSA Score
50		**0.15**		**0.14**		

示例 1制药

问题：医疗保健项目可及性（产品与药品）	公司是否有项目来改善医疗保健产品与药品的可及性，并且这些项目是否公开可用?
问题得分	0–100
问题在标准中的权重	15%
标准	对社会医疗保健的贡献
维度	社会
CSA 理由	发达国家和发展中国家的弱势患者往往面临财务限制，难以获得对其疾病治疗至关重要的药物和治疗。制药和生物技术行业的可持续发展领导者正在采取创新措施来应对这些社会问题，为弱势患者提供获得药品和产品的途径。反过来，这些公司也从提升自身信誉、企业品牌和产品品牌以及产品和服务的市场渗透的机会中受益。我们的问题聚焦于公司为增加发展中国家和发达国家的药品可及性所采取的措施。

可能的答案	授予分数
A. 潜在方法列表（公司可勾选所有适用项）	0–100（取决于所选择的方法）
B. 不适用	被标记为"不适用"的问题将不会计分，该问题的权重将在同一标准下的其他问题之间平均重新分配，仅当分析师同意该问题不适用于公司的商业模式时。该选项仅在特殊情况下授予。
C. 未知	0

[5]如需了解更多关于企业可持续发展评估所使用方法论的信息，请参阅CSA手册，其中提供了关于CSA通用标准和跨行业标准的依据与结构的更多细节。CSA手册可在CSA资源中心访问：www.spglobal.com/esg/csa/csa-resources/csa-methodology。

假设该公司 对该问题的回应获得50分，其得分将按以下方式计算 s:

数量 获得分数		问题权重 （在标准范围内）		标准权重 （在问卷范围内）		问题得分 =
（介于0到100之间）	X	15/100 =	X	14/100 =	=	标普全球的1.05 CSA得分
50		**0.15**		**0.14**		

Example 2

Banks

Question: Customer Privacy Information	Does the company inform customers regarding privacy protection issues and is this information available publicly?
Question Points	0–100
Question weight within criterion	50%
Criterion	Privacy Protection
Dimension	Social
CSA Rationale	Networked data and globalized corporate activities require careful handling. Insufficient database and network protection, unclear management of personal information and vague database access rules could expose companies to large risks in case of personal data leakage and misuse, or unauthorized access. For companies to avoid legal costs, reputational risk, and exclusion from certain activities, a company-wide privacy policy is paramount. Our questions focus on the coverage of the company's privacy policy and the mechanism in place to ensure the policy's effective implementation.

Possible Answers	Number of Points Awarded
A. List of potential approaches (company can check all that apply)	0–100 (depending on which approaches have been selected)
B. Not applicable	A question that has been marked "Not Applicable" will not be scored and the weight of the question will be equally redistributed across the other questions within the same criterion, only if the analyst agrees that the question does not apply to the company's business model. This option is only granted in exceptional cases.
C. Not known	0

Assuming the company receives 67 points for its response to this question, its score will be calculated as follows:

Number of Points Received		Question Weight (within the criterion)		Criterion Weight (within questionnaire)		Question Score =
(between 0 and 100) **67**	X	50/100 = **0.50**	X	4/100 = **0.04**	=	**1.34 of S&P Global CSA Score**

示例 2

银行

问题：客户隐私信息	公司是否就隐私保护问题告知客户，并且该信息是否可公开获取?
问题得分	0–100
问题在标准中的权重	50%
标准	隐私保护
维度	社会
CSA 理由	网络化数据和全球化企业活动需要谨慎处理。数据库和网络保护不足、个人信息管理不清晰以及数据库访问规则不明确，可能使公司在个人数据泄露和滥用或未经授权的访问情况下面临巨大风险。为了避免法律成本、声誉风险以及被排除在某些活动之外，公司必须制定全公司隐私政策。我们的问题侧重于公司隐私政策的覆盖范围以及确保该政策有效实施的机制。

可能的答案	授予分数
A. 潜在方法列表（公司可勾选所有适用项）	0–100（取决于所选的方法）
B. 不适用	被标记为"不适用"的问题将不计入得分，该问题的权重将在同一标准下的其他问题之间平均重新分配，仅在分析师同意该问题不适用于公司商业模式的情况下。该选项仅在特殊情况下授予。
C. 未知	0

假设该公司在此问题的回应中获得 67分，其得分将按如下方式计算：

数量 获得的分数		问题权重 （在标准内）		标准权重 （在问卷内）		问题得分 =
（0 到 100 之间） **67**	X	50/100 = **0.50**	X	4/100 = **0.04**	=	**标普全球的1.34 CSA得分**

Calculating the S&P Global ESG Score:

S&P Global CSA Score = Σ (Number of Question points received x Question Weight x Criterion Weight)

A company's S&P Global CSA Score at the highest aggregated level is the sum of all Question Scores. Each company receives a S&P Global CSA Score ranging from 0–100.

Additional insights into our scoring methodology can be found in our "S&P Global ESG Scores Methodology" document.

Media and Stakeholder Analysis (MSA)

The S&P Global Media and Stakeholder Analysis ('MSA') forms an integral part of the S&P Global Corporate Sustainability Assessment ('CSA') and enables S&P Global to monitor companies' sustainability performance on an ongoing basis by assessing current controversies with potentially negative reputational or financial impacts. The main objective of the MSA process is to gain insight into a company's ability to mitigate financially material and reputational risks, as well as impacts on stakeholders and the environment, whilst protecting their shareholder value.

Media and stakeholder stories on corporate controversies are monitored on an ongoing basis through S&P Global's proprietary controversies screening model, which, based on pre-defined filters, aggregates and pre-screens content from global, local and regional news sources, governmental and non-governmental organizations, legal materials, as well as industry publications, among others.* The stories may vary considerably, pertaining to issues such as crime, corruption, fraud, illegal commercial practices, human rights abuses, labor disputes and workplace safety, catastrophic accidents, or environmental violations, for example.

Measuring MSA Impact

Measuring MSA impact is a step-wise process that begins with identifying an MSA case. An MSA "case" is created by expert research analysts if, according to the MSA methodology, a company is considered responsible for a material negative event or wrongdoing, revealing that the company's actions are inconsistent with its stated policies and commitments, accepted best practices or regulations. Once an MSA case has been opened, the respective companies are contacted and given the opportunity to respond with relevant information and plans to address the issue, minimize negative impacts, and prevent reoccurrence.

The MSA case is then assessed to determine its impact on a company's CSA Score. The MSA case is scored based on the impact of the case (which can be minor, medium, major or severe) and the response of the company to the incident. Both the impact rating and the company response are used to assign an "MSA multiplier" — a coefficient used to adjust relevant affected CSA criteria in proportion to the negative impact of MSA cases.

Figure 5 provides an overview of how a specific MSA case is identified, evaluated and integrated into the CSA. Figure 6 provides a formula for how the MSA multiplier is used in calculating final criteria scores (if any).

*Prior to March 16, 2026, corporate controversies part of the MSA were monitored, compiled and pre-screened by S&P Global' s former partner RepRisk.

计算标普全球ESG评分：

标普全球CS 得分 = Σ （获得的问题得分数量 x 问题权重 x 标准权重)

公司标普全球CSA得分在最高汇总层面上是所有问题得分的总和。每家公司获得的标普全球CSA得分范围为0–100。

有关我们评分方法论的更多见解，请参阅我们的"标普全球ESG评分方法论"文档。

媒体与利益相关者分析（MSA）

标普全球媒体与利益相关者分析（"MSA"）是标普全球企业可持续发展评估（"CSA"）不可或缺的组成部分，通过评估当前具有潜在负面声誉或财务影响的争议，使标普全球能够持续监控公司的可持续发展绩效。MSA流程的主要目标是深入了解公司减轻财务重大风险和声誉风险的能力，以及对利益相关方和环境的影响，同时保护其股东价值。

关于企业争议的媒体和利益相关者报道，通过标普全球专有的争议筛选模型持续进行监测。该模型基于预定义筛选条件，汇集并预筛选来自全球、地方和区域新闻来源、政府和非政府组织、法律材料以及行业出版物等渠道的内容。* 这些报道可能差异很大，例如涉及犯罪、腐败、欺诈、非法商业行为、侵犯人权、劳资纠纷和工作场所安全、灾难性事故或环境违规等问题。

衡量MSA影响

衡量MSA影响是一个循序渐进的过程，首先要识别MSA案例。根据MSA方法论，如果专家研究分析师认为某家公司对重大负面事件或不当行为负有责任，表明该公司的行为与其声明的政策、承诺、公认最佳实践或法规不一致，就会创建MSA"案例"。一旦MSA案例被立案，相关公司将被联系，并有机会以相关信息及计划作出回应，以解决问题、尽量减少负面影响并防止再次发生。

随后对MSA案例进行评估，以确定其对公司CSA得分的影响。MSA案例根据案例的影响程度（可为轻微、中等、重大或严重）以及公司对事件的回应进行评分。影响评级和公司回应均用于分配"MSA乘数"——一种用于根据MSA案例的负面影响按比例调整相关受影响CSA标准的系数。

图5概述了如何识别、评估特定MSA案例并将其纳入CSA。图6提供了MSA乘数在计算最终标准评分（如有）时的使用公式。

*在2026年3月16日之前，参 与MSA的公司争议由标普全球的合作伙伴合作伙伴RepRisk。

er

Figure 5

Overview of the MSA process: from identification to resolution

	1 Identification of MSA case	2 Impact evaluation	3 Initiate company contact	4 Evaluation of company's response	5 Selection of CSA Criteria	6 Applying the MSA Multiplier to calculate impact on CSA criteria score
Description	• When a controversial incident is flagged, the decision to open an MSA case is based on (1) company responsibility and (2) incident materiality. Details of each element can be found in MSA Methodology Guidebook.	The case's impact is judged as minor, medium, major or severe according to different parameters within the Governance/Economic, Environmental & Social Pillars as well as within the Reputational Impact pillar. Further details are provided in the MSA Methodology Guidebook.	When an MSA case is identified, the affected company is requested to respond via the CSA online platform, including evidence of communications to stakeholders and corrective measures taken.	The analyst evaluates the company's response based on different parameters related to mitigation, prevention, remediation, transparency, and the nature of response The company's response is categorized in four ratings: • None or very limited • Limited • Adequate • Comprehensive Further details can be found in the MSA Methodology Guidebook.	The analyst matches MSA case details to the relevant CSA criteria: The Affected Criteria that are identified will be any of the CSA Criteria. Major cases usually involve several criteria, while minor cases typically impact just one or two. In most cases, the more criteria affected, the greater the impact on the company's ESG Score.	A two-step approach is used to calculate the impact of MSA cases on CSA criteria: 1. Translate the assigned Impact Rating and Company Response Rating to the corresponding 'MSA Multiplier' using the pre-defined MSA Multiplier Matrix. 2. Apply the MSA Multiplier in a fixed formula to calculate the numerical impact on the Affected Criteria score.
Example	Company A pleads guilty to violating national anti-competitive law. It is fined US $1 billion and agrees to settle with the US Department of Justice. New information reveals it obstructed justice using forged documents resulting in a higher fine than other companies involved.	The analyst determines the case has major impact: • The breach of regulations and company policies is significant • The fined amount is significant relative to company earnings and other fines given in that industry • Guilty plea and associated fine are broadly covered in international media, contributing to negative reputational impact.	The analyst contacts the company. Company A states it has issued a press release announcing the fine but provides no further information on corrective measures undertaken to prevent future incidents.	Company A has communicated the case to its stakeholders, but did not indicate whether processes or control mechanisms were re-evaluated and improved. Based on the analytical assessment of the company response rating parameters, the company response is categorized as "Limited".	The analyst determines the following CSA criteria are affected: • Risk and Crisis Management: Company A deliberately engaged in non-compliant behavior indicating inadequate risk control mechanisms • Business Ethics: Company A violated best practice in business ethics and the company's own code of conduct • Corporate Governance: Company A's executives were aware of the wrongdoing and failed to take prompt action.	Based on the major negative impact of the case and the evaluation of the company's response, a low MSA multiplier is assigned. The MSA Multiplier is applied in a fixed formula to impact the original CSA criterion score which significantly reduces the final CSA criteria scores (e.g. Risk and Crisis Management Criteria and Business Ethics).

图5MSA流程概述：从识别到解决

	1 识别 MSA案例的	2 影响 评估	3 启动公司 联系	4 评估 公司回应	5 CSA 的选择 标准	6 应用MSA乘数 以计算对 CSA标准得分的影响
Description	• 当有争议的 事件被标记时， 决定开启 一个MSA案例是基于 (1) 公司 责任和 (2) 事件重要性。 每个的详细信息 内容可参见 《MSA方法论 指南》。	该案例的影响被 判定为轻微、 中等、重大或严重， 取决于不同的 参数， 治理/经济， 环境与社会 支柱以及内部 声誉影响 支柱。更多详细信息 在 MSA 方法论指南。	当MSA案例被 识别后，受影响的 公司会被要求 通过以下方式回应： CSA在线平台， 包括以下证据： 通信至 利益相关方 以及采取的纠正 措施。	分析师评估 公司回应 依据不同的 相关参数 缓解、预防、 补救、 透明度，以及 回应的性质。 公司回应 分为四个 评级： • 无或非常有限 • 有限 • 充分 • 全面 更多详情可 参阅MSA 方法论 指南。	分析师将 MSA案例详情与 相关CSA标准： 受影响的 已识别标准将 属于任何CSA 标准。重大案例 通常涉及多个 标准，而轻微 案例通常影响 仅一两个。在大多数 案例中，受影响的标准 越多， 对 公司ESG评分的影响。	采用两步法 来计算 MSA案例 对CSA标准的影响： 1. 将指定的 影响评级 和 公司 回应评级 翻译为 相应的 'MSA乘数' 使用预先 定义的MSA 乘数矩阵。 2. 应用MSA 乘数在 固定公式中 用于计算 数值影响 对受影响 标准得分的影响。
Example	公司A认罪， 承认违反了国家 反竞争法。其 被罚款10亿美元，并 同意与 美国司法部 达成和解。新 信息显示其 利用以下方式妨碍司法 伪造文件 导致更高的 罚款比其他 涉事公司。	分析师判定 该案例具有 重大影响： • 违反 法规和 公司政策是 重大的 • 罚款金额是 相对于以下而言是重大的 公司收益 以及其他罚款 在该行业中 • 认罪答辩及 相关罚款 被广泛报道于 国际媒体， 导致 负面的 声誉影响。	分析师联系 该公司。 公司A表示其 已发布了一份新闻 稿，宣布了 罚款，但未提供 关于以下方面的进一步信息 纠正措施 为防止而采取的 未来事件。	公司A已 通报了该案例 向其利益相关方，但 并未表明是否 流程或控制 机制得到了 重新评估和 改进。基于 分析评估 公司的 回应评级 参数， 公司回应被 归类为 "有限"。	分析师确定 以下CSA 标准受到影响： • 风险与危机 管理： 公司A 故意参与 在不合规 表明行为 风险控制 控制机制 • 商业道德： 公司A违反了 最佳实践，在 商业道德和 公司自身的 行为准则 • 企业 治理： 公司A的 高管 知晓 该不当行为， 却未能及时 行动。	基于重大 负面影响 案例与评估 公司的 回应，较低的MSA 乘数被分配。 MSA乘数被 应用于固定的 公式影响 原始CSA标准 得分的公式， 会显著降低 最终的CSA标准评分 （例如风险与危机 管理标准 与商业道德）。

Please see MSA Methodology Guidebook for a more detailed description of the MSA multiplier calculations with examples.

The hypothetical MSA example has been provided for illustrative purposes only and does not reflect an actual MSA case or outcome. MSA scores have been arbitrarily applied and are used for illustrative purposes.

Source: S&P Global ESG Research

A simplified model for adjusting CSA criteria for MSA risk is below.

Based on the example outlined in Figure 5, Company A receives a low MSA Multiplier. This Multiplier is then used to calculate the final scores of the relevant CSA criteria of "Business Ethics" and "Risk and Crisis Management." Please see Figure 6.

Figure 6
Applying the MSA Multiplier* to CSA criterion scores

CSA criterion score without MSA adjustment	X	MSA Multiplier Calculation	=	Final Criterion Score
Unadjusted Score Codes of Business Conduct	X	MSA Multiplier Calculation	=	Final Score for Business Conduct
Unadjusted Score Risk and Crisis Management	X	MSA Multiplier Calculation	=	Final Score for Risk and Crisis Management

If a company has no MSA cases identified during the course of the campaign year, the criterion score will remain unchanged. For more details on our updated scoring approach and the decision process used to determine an MSA impact, please refer to the MSA Methodology Guidebook.

* For detailed information on the MSA multiplier, please refer to the MSA Methodology Guidebook

请参阅MSA 方法论指南，以获取有关MSA乘数计算及示例的更详细说明。

该假设性MSA案例仅用于说明目的，并不反映实际的MSA案例或结果。MSA得分系任意设定，仅用于说明目的。

来源：标普全球ESG研究

以下是根据MSA风险调整CSA标准的简化模型。

根据图5中列出的示例，公司A获得了较低的MSA乘数。随后，该乘数被用于计算以下各方的最终得分相关的"商业道德"和"风险与危机管理"CSA标准。请参见图6。

图6 将MSA乘数*应用于CSA标准得分

未经MSA调整的 CSA标准得分	X	MSA乘数计算	=	最终标准得分
未调整得分代码 商业行为	X	MSA乘数计算	=	最终得分 商业行为
未调整得分 风险与危机管理	X	MSA乘数计算	=	最终得分： 风险与危机管理

如果某公司在活动年度期间未被发现存在MSA案例，则该标准得分保持不变。有关我们更新后的评分方法的更多详情用于确定MSA影响的方法和决策过程，请参阅MSA方法论指南。

* 有关MSA乘数的详细信息，请参阅MSA方法论指南

Updating the Questionnaire — Raising the Bar

The CSA is reviewed on an annual basis and adjustments are made to the methodology in order to enhance reporting and stay relevant with issues already captured and to address emerging, forward looking sustainability issues that are expected to have an impact on companies in the coming years. This approach allows the CSA to address under-reported topics of interest to investors and other stakeholders and challenge companies on new sustainability topics that may be part of upcoming regulatory changes or future reporting guidelines or requirements. A detailed review of the previous year's results is performed at the end of each assessment cycle in order to identify areas for improvement, apply scoring updates, provide methodology clarifications or to reconsider questions that can be removed from the questionnaire.

Analysts within S&P Global Sustainability Research & Methodology team are assigned to specific industries and draw upon knowledge gained through their participation in industry conferences, roundtable discussions with industry organizations, as well as direct contact with companies throughout the course of the year in order to determine which industry-specific criteria within the CSA warrant review. As a general rule, analysts rely on their sustainability and financial expertise to determine the materiality of sustainability topics, both current and upcoming — identifying which sustainability opportunities and challenges are most likely to have an impact on a company's financial performance. This materiality review also aids analysts in determining the overall weight questions and criteria will have within each industry-specific questionnaire. In addition to their industry coverage, analysts are assigned general and cross-industry criteria, such as Supply Chain Management, Occupational Health and Safety and Corporate Governance.

In addition to performing a fundamental review of the sustainability topics in the CSA, S&P Global Sustainability Research & Methodology team also performs statistical analysis of companies' scores to identify questions that merit further review. Examples include questions at the extremes (i.e. where all or most companies received the highest or the lowest score) or questions that have a very low statistical distribution of scores.

This analysis provides us with an indication of which questions may be outdated, which corporate sustainability practices have been widely adopted by companies, or which ones may need to be refined in order to more adequately distinguish the leaders from the laggards.

Once the methodology priorities for an assessment year have been decided, and adequate background research has been performed on the topics, S&P Global Sustainability Research & Methodology team is responsible for ensuring that the proposals are translated into the CSA and systematically and objectively applied to the respective industries and companies. This also extends to how company answers are appraised and how final scores for each question are calculated.

Starting Q1 2024, S&P Global has introduced a new principal-based approach to methodology and modeling governance. The review will be conducted by Covered Methodology and Model Governance Committee (CMMGC). The committee will conduct review of new CSA methodologies and changes to existing methodology.

A Peer Review sub-Committee is set up to provide feedback and recommendations related to updated CSA methodology to CMMGC.

There is also an independent quality assessment process focusing on Analytical Risk and Quality and it will provide its report to the Sustainability Research & Methodology team and to CMMGC.

New CSA methodology or any updates to the existing methodology will be considered once it is approved by CMMGC after thorough review.

Once the CSA methodology is approved by CMMGC and a new assessment cycle has been launched, S&P Global CSA Data and Sustainability Research & Methodology team manages the assessment process, interactions with companies, and the overall quality control process. They are also responsible for ensuring that the assessment process remains objective and independent of S&P Global's other business units.

An overview of the methodology review process is provided in Figure 7.

Upda填写问卷——提高标准

CSA每年进行一次审查，并对方法论进行调整，以增强报告、与已涵盖的议题保持相关性，并应对预计在未来几年对公司产生影响的新兴、前瞻性可持续发展议题。该方法使CSA能够处理投资者和其他利益相关方关注但报告不足的议题，并就需要被邀请参与新可持续发展议题的公司提出挑战，这些议题可能属于即将出台的监管变化或未来报告指南或要求的一部分。在每个评估周期结束时，会对上一年度的结果进行详细审查，以确定改进领域、应用评分更新、提供方法论澄清，或重新考虑可从问卷中移除的问题。

标普全球可持续发展研究与方法论团队的分析师被分配至特定行业，他们凭借通过参加行业会议、与行业组织进行圆桌讨论以及全年与公司直接接触所获得的知识，来确定CSA中哪些行业特定标准需要审查。作为一般规则，分析师依靠其可持续发展与财务专业知识来判断当前及未来可持续发展议题的重要性——识别哪些可持续发展机遇和挑战最有可能对公司的财务绩效产生影响。这种重要性审查还有助于分析师确定各问题及标准在每个行业特定问卷中所占的总体权重。除了行业覆盖范围外，分析师还被分配通用和跨行业标准，如供应链管理、职业健康与安全以及公司治理。

除了对CSA中的可持续发展议题进行根本性审查外，标普全球可持续发展研究与方法团队还对公司的得分进行统计分析，以识别需要进一步审查的问题。例如，处于极端情况的问题（即所有或大多数公司获得最高分或最低分的问题），或得分统计分布非常低的问题。

这一分析为我们提供了以下指示：哪些问题可能已过时，哪些企业可持续发展实践已被公司广泛采用，或哪些实践可能需要完善，以便更充分地区分领先者与落后者。

一旦某评估年度的方法论优先事项确定，并且已就相关议题完成了充分的背景研究，标普全球可持续发展研究与方法论团队负责确保这些提案被转化为CSA，并系统、客观地应用于各行业和公司。这还包括公司答案的评估方式以及每个问题的最终得分的计算方式。

自2024年第一季度起，标普全球在方法论与建模治理方面引入了新的基于原则的方法。审查将由覆盖方法论与模型治理委员会（CMMGC）进行。该委员会将对新的CSA方法论及现有方法论的变更进行审查。

同行评审小组委员会已成立，负责就更新后的CSA方法论向CMMGC提供反馈和建议。

此外还有一个独立的质量评估流程，聚焦于分析风险与质量，并将向可持续发展研究与方法论团队及CMMGC提交其报告。

新的CSA方法论或对现有方法论的任何更新，须经CMMGC全面审查并批准后方可被采用。

一旦CSA方法论获得CMMGC批准且新的评估周期已启动，标普全球CSA数据与可持续发展研究与方法论团队将负责管理评估流程、与公司的互动以及整体质量控制流程。他们还负责确保评估流程保持客观，并独立于标普全球的其他业务部门。

方法论审查流程的概述见图7。

Figure 7
Updating the CSA

Covered Model and Methodology Governance Committee Oversight

Decision-making body governing 'potentially' regulated models and methodologies associated with ESG scores including CSA

Sustainability Research & Methodology

Responsibilities:

- Top-down responsibility for overall structure of the questionnaire and implementation of the CSA methodology
- Oversight of CSA methodology development
- Industry-specific expertise
- ESG experts assigned to general or crossindustry criteria Contribution to CSA methodology development

Statistical analysis of questionnaire to identify questions for review:

- Questions with low statistical distribution of scores
- Questions in which most companies received scores of either 0 or 100

Suggestions of modifications, deletions or additions to industry specific, general or cross-industry criteria

Integration of feedback based on discussions with companies, roundtables, sustainability experts, etc.

Finalization of proposed changes for criteria that have been prioritized by the Methodology Committee

- Relative weights are adjusted, giving more weight to most materially relevant topics for the industry
- Major changes are subject to external consultation round with companies and industry experts

Update CSA

S&P Global Sustainability Research & Methodology implements methodology changes while ensuring:

- Consistency of questionnaire structure across industries
- Minimal redundancy within the questionnaire
- Objective, consistent scoring
- Clear internal guidelines for consistent appraisal of data
- Independence and integrity of the review process

Source: S&P Global Sustainability Research

External Verification

Information provided in the questionnaire is verified for accuracy by crosschecking companies' answers with the supporting documentation they have provided, checking publicly available information, and by verifying a company's track record on crisis management with media and stakeholder reports.

In addition, to support the quality and objectivity of the CSA, we voluntarily obtain independent third party assurance.

图7 更新CSA

受覆盖模型与方法治理委员会监督

决策 治理与ESG评分（包括CSA）相关的"潜在"受监管模型与方法论的决策机构

可持续发展研究与方法论

职责：

- 自上而下的职责负责整体结构问卷和CSA的实施方法论
- CSA监督方法论开发
- 行业专业知识
- ESG专家被分配至通用或跨行业标准的贡献CSA方法论发展

统计分析问卷以识别复习问题：

- 得分统计分布较低的题目得分情况
- 大多数公司企业收到得分为0或100

修改建议，删除或添加行业特定、通用或跨行业标准

基于反馈的整合基于与公司、圆桌会议、可持续发展专家等的讨论

最终确定拟议的标准变更，这些标准已被优先考虑，由方法学委员会

- 相对权重经过调整，给予更多权重对最具实质性相关的行业议题
- 重大变更须经外部磋商轮与公司及行业专家

更新CSA

标普全球可持续发展研究与方法实施方法论变更的同时确保：

- 一致性问卷结构跨行业
- 最小冗余问卷内
- 客观、一致评分
- 明确的内部指南，用于一致的数据评估
- 独立性与诚信评审流程的

来源：标普全球可持续发展研究

外部验证

问卷中提供的信息通过以下方式核实其准确性：将公司的回答与其提供的支持性文件进行交叉核对、查阅公开信息，以及通过媒体与利益相关者报告来验证公司在危机管理方面的过往记录。

此外，为支持CSA的质量和客观性，我们自愿获取独立第三方鉴证。

Leveraging Sustainability Insights

In addition to determining the components of the full range of the Dow Jones Best in Class Indices, the CSA information is also used to construct innovative products. The S&P Global ESG Scores are available to investors globally through S&P Global Market Intelligence platforms.

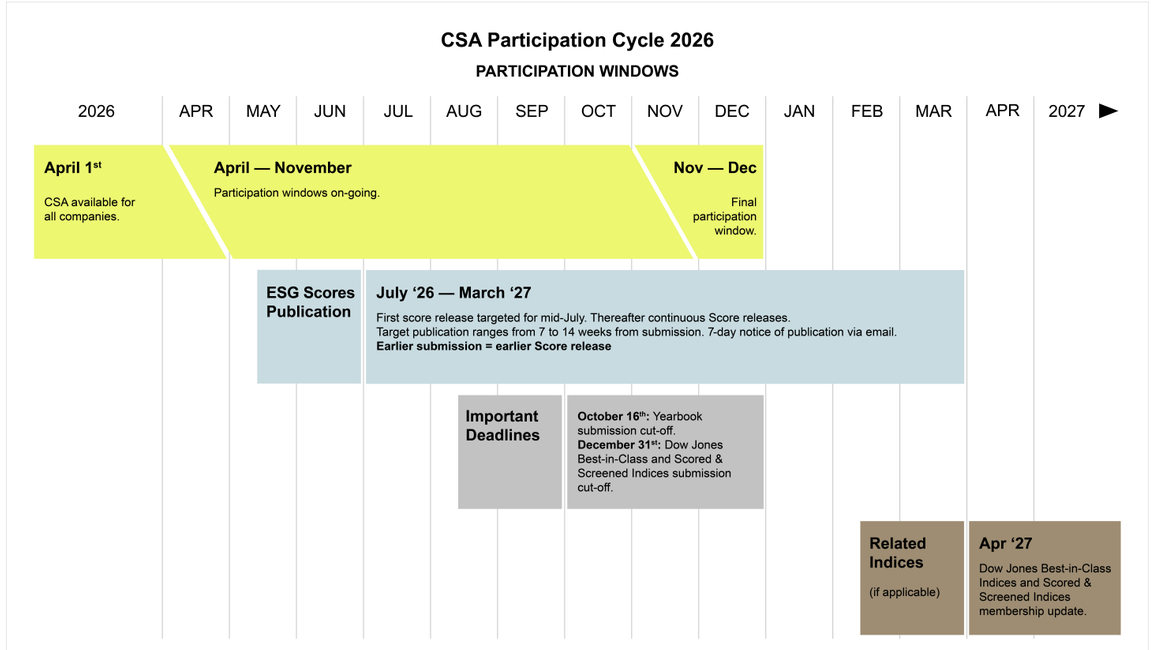

Furthermore, the results of the CSA are used to determine the companies that are eligible for inclusion in The Sustainability Yearbook* — a reference guide to the world's sustainability leaders.

The Sustainability Yearbook provides extensive qualitative analysis highlighting current and future challenges shaping the competitive landscape for each of the 62 industries.

In addition, The Sustainability Yearbook contains statistical information indicating the total number of companies assessed for each industry, as well as the average and top scores at the dimension level.

Annual Milestone

Conclusions: The Benefits of Measuring ESG Performance

Investors' demand for long-term oriented strategies that integrate economic, environmental and social criteria within their portfolios is expected to grow. As investors seek to invest in companies with a superior business model and attractive long-term potential, their stock selection decisions will increasingly be influenced by sustainability considerations.

The results of the Corporate Sustainability Assessment are a suitable reference for determining the integrated value of a firm. This includes its's intangible assets, with a more holistic assessment leading to better informed investment decisions.

By using industry-specific criteria to identify sustainability leaders that are likely to outperform in the long run, the CSA's best-in-class approach creates vibrant competition among companies within the same industry. In doing so, it supports acceleration in the momentum toward greater sustainability across all industries.

结论：衡量ESG绩效的益处

投资者对在其投资组合中纳入经济、环境和社会标准的长期导向战略的需求预计将持续增长。随着投资者寻求投资于拥有卓越商业模式和诱人长期潜力的公司，其选股决策将日益受到可持续发展考量的影响。

企业可持续发展评估的结果是确定公司综合价值的合适参考依据。这包括其无形资产，更全面的评估有助于做出更明智的投资决策。

通过采用行业特定标准来识别有望在长期内表现优异的可持续发展领导者，CSA的同类最佳方法在同一行业内的公司之间创造了充满活力的竞争。借此，它支持加速所有行业迈向更高可持续发展水平的势头。

S&P Global shall have no liability, duty or obligation for or in connection with this Content, any other related information (including for any errors, inaccuracies, omissions or delays in the data) and/or any actions taken in reliance thereon. In no event shall S&P Global be liable for any special, incidental, or consequential damages, arising out of the use of this Content and/or any related information.

The S&P and S&P Global logos are trademarks of S&P Global registered in many jurisdictions worldwide. You shall not use any of S&P Global's trademarks, trade names or service marks in any manner, and in no event in a manner accessible by or available to any third party. You acknowledge that you have no ownership or license rights in or to any of these names or marks.

Adherence to S&P's Internal Polices

S&P Global adopts policies and procedures to maintain the confidentiality of non-public information received in connection with its analytical processes. As a result, S&P Global employees are required to process non-public information in accordance with the technical and organizational measures referenced in the internal S&P Global Information Security and Acceptable Use policies and related guidelines.

Conflicts of Interest

S&P Global is committed to providing transparency to the market through high-quality independent opinions. Safeguarding the quality, independence and integrity of Content is embedded in its culture and at the core of everything S&P Global does. Accordingly, S&P Global has developed measures to identify, eliminate and/or minimize potential conflicts of interest for Sustainable1 as an organization and for individual employees. Such measures include, without limitation, establishing a clear separation between the activities and interactions of its analytical teams and non-analytical teams; email surveillance by compliance teams; and policy role designations. In addition, S&P Global employees are subject to mandatory annual training and attestations and must adhere to the Sustainable1 Independence and Objectivity Policy, the Sustainable1 Code of Conduct, the S&P Global Code of Business Ethics and any other related policies.

本内容不得修改、逆向 工程、复制或以任何形式通过任何方式分发，未经标普全球事先书面许可。 al.
对于本内容及其中任何相关文本、图形、照片、商标、标识、声音、音乐、音频、视频、艺术作品、计算机代码、信息、数据及材料，您不获得任何权利或许可，仅享有将本内容用于您个人、内部、非商业目的的有限权利，或本协议另有规定的权利。

未经标普全球事先同意，不允许对本内容或任何相关信息进行任何未经授权的使用、协助或鼓励第三方未经授权的使用（包括但不限于复制、分发、传输、修改、用作生成式人工智能的一部分或用于训练任何人工智能模型），且应视为对标普全球或任何适用第三方权利的侵犯、违反、违反或违反（包括任何版权、商标、专利、隐私权或公开权或任何其他专有权利）。

本内容及相关材料仅基于通常可向公众获取的信息以及被认为可靠的来源，为提供信息之目的而开发。标普全球不对本内容的使用和/或其特定用途适用性作出任何陈述或保证，本内容中提及的特定投资或证券、得分、评级或任何关于投资或证券的观察，不构成买入、卖出或持有该投资或证券的建议，不涉及投资或证券的适宜性，且不应作为投资建议加以依赖。

标普全球不对本内容或任何其他相关信息承担任何责任、义务或职责（包括对数据中的任何错误、不准确、遗漏或延迟），也不对依赖该等内容而采取的任何行动承担任何责任。在任何情况下，标普全球均不对因使用本内容和/或任何相关信息而产生的任何特殊、附带或间接损害承担责任。

标普和标普全球标识是标普全球在许多司法管辖区注册的商标。您不得以任何方式使用标普全球的任何商标、商号或服务标记，且在任何情况下均不得以任何第三方可访问或可获得的方式使用。您确认您对这些名称或标识不享有任何所有权或许可权利。

遵守标普内部政策

标普全球采用相关政策和程序，以对其在分析过程中收到的非公开信息予以保密。因此，标普全球员工须按照标普全球信息安全与可接受使用政策及相关指南中所述的技术和组织措施处理非公开信息。

利益冲突

标普全球致力于通过高质量的独立意见为市场提供透明度。维护内容的质量、独立性和诚信已融入其文化，是标普全球一切工作的核心。因此，标普全球已制定措施，以识别、消除和/或尽量减少Sustainable1作为组织以及员工个人面临的潜在利益冲突。此类措施包括但不限于：在其分析团队与非分析团队的活动和互动之间建立明确的隔离；合规团队的电子邮件监控；以及政策角色指定。此外，标普全球员工须接受强制性年度培训和认证，并必须遵守Sustainable1独立性与客观性政策、Sustainable1行为准则、标普全球商业道德准则及任何其他相关政策。
