Introduction

This document provides an overview of the main features of S&P Global's Sustainability Portal, focusing on elements relating to the Corporate Sustainability Assessment (CSA).

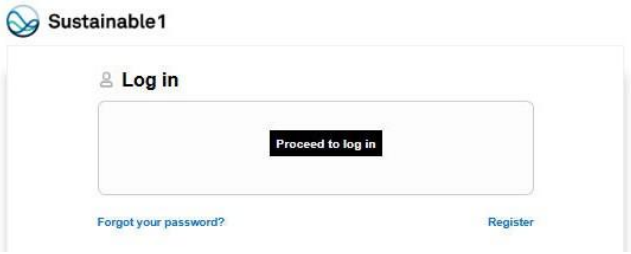

Figure 1: Portal log in page

Companies register their respective Portal accounts and provide access to colleagues who can then log into the Portal with their email and password. Three attempts can be made to log in, after which the account will be locked for 5 minutes for security reasons. You will be able to request a new password for your account by selecting 'Forgot your password?' on the login page.

All functionalities can be accessed using the tabs located in the top header on the Portal's landing page.

Figure 2: Overview of tabs on the landing page.

The Sustainability Portal is a tool designed by S&P Global to support companies in their ESG journey. Prior to 2025, the Portal was solely used by companies assessed through the Corporate Sustainability Assessment (CSA), whereas it is now home to various frameworks and questionnaires.

This guide is specific to the CSA elements within the Sustainability Portal, but will provide details on some areas where there is overlap, such as the Dashboard. For questions that are not specific to the CSA, please use the resources and contact information provided within that product's respective section of the Portal.

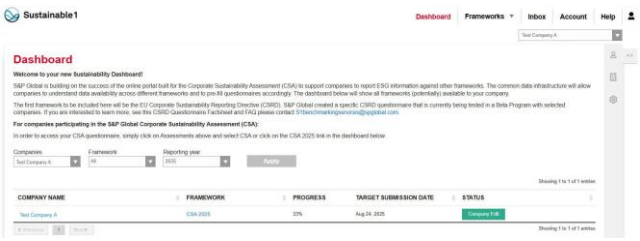

Figure 3: Overview of Dashboard page

As there can be one email address associated with multiple companies, the first column of the Dashboard shows the company name. There is also a dropdown menu that can filter dashboard results by company name.

The second column provides the framework name. For the CSA options, you will look for 'CSA' and the associated year.

The progress column provides a mathematical view of the completion level of the questionnaire. You can also see this percentage towards the top of the Questionnaire page. See the CSA Completion Status section of this Guide for further information on the calculation method.

For the purposes of the CSA, the target submission date is the due date/last day of the participation window.

The status column indicates the stage of completion for the entire assessment (i.e., through the analysts' review and publication of the results). Not Started, Company Edit, Analyst Review, and Published are the possible statuses.

Frameworks Tab- CSA Menu

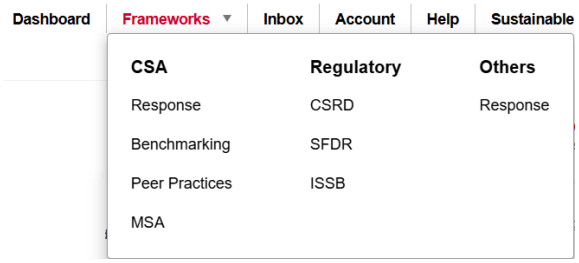

Figure 4: Expanded Frameworks tab in top menu navigation.

Response

Figure 5: Subsections within 'Response'.

Confirmation

The 'Confirmation' section allows you to view the available participation windows as well as the resulting impact of choosing a specific window (i.e., anticipated score release date, and/or cut-off dates for Sustainability Yearbook eligibility).

Participation windows are subject to quotas and are available on a first-come, first-served basis.

Select a Participation Window

Your company's participation must be confirmed each year in order to respond to the questionnaire. A company can only participate after selecting an assessment participation window and a data point confidentiality designation within the Sustainability Portal.

Only an administrator user may select or modify the company's participation window.

If a company does not wish to participate at this time, or would like to receive more information, these options are also available in the 'Response' part of the 'Confirmation' section. An interested invited company may view the questionnaire online or download a PDF version without selecting a participation window.

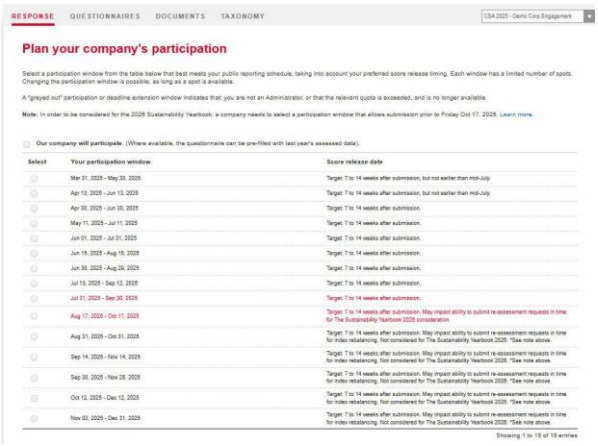

Figure 6: Selecting a participation window (self-paced).

Confirmation of participation is non-binding, and any information entered into the Portal will not be used unless the questionnaire is submitted by an administrator. Accessing the questionnaire online or downloading a PDF version of the questionnaire does not require confirmation of participation but does require a registered company account for the Sustainability Portal.

Participation Window Types

There are two types of participation window options: self-paced and review & add.

Self-paced: Company responds to questionnaire (using prefill of analyst-assessed data from prior year when available) at the start of the selected window. Once finished, the company submits the questionnaire to S&P Global for analyst-review and scoring.

Review & add: Company selects a participation window from the second table of options. The first column of the table indicates the date by which the company's most recent public reporting should be available online. The 30 days following this date is the period of time when S&P Global's analysts will review the company's publicly available data and respond to the assessment questions. The dates in the second column show the period of time when the company's representatives should edit the assessment conducted by the analysts and add any additional information. Once complete, the company will submit the edited questionnaire back to the analysts for review and scoring.

Figure 7: Selecting a participation window (review & add).

Changing Your Assessment Participation Window

A company may change its participation window as long as it has not started the questionnaire (i.e., has not selected the start questionnaire button). Once the questionnaire has been started, a company cannot change its window, however it can request a deadline extension via the 'Confirmation' section. Deadline extensions are also subject to quotas and are available on a first-come, first-served basis.

Data Point Confidentiality Designation

As part of confirming your company's participation, an administrator must also select a data point confidentiality designation before you can start working on the questionnaire. The Portal will not allow you to start editing the questionnaire until you do so. You may change the designation in the 'Confirmation' section at any point up until submission of the questionnaire. For more information on the data point confidentiality options see this FAQ.

We will apply the same scoring approach to all companies, independent of the chosen Confidentiality Designation Option for Data Points.

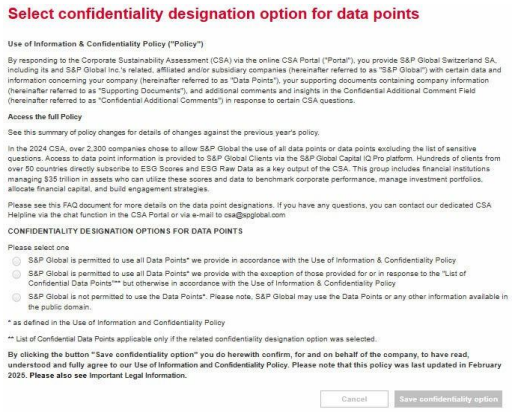

Figure 8: Selecting a data point confidentiality designation.

Selecting a Deadline Extension

A company may request a deadline extension only once the selected participation window has opened and the company has started the assessment by clicking the 'Start Questionnaire' button in the 'Questionnaires' section. The deadline extension may be requested directly via the 'Response' part of the 'Confirmation' section within the 'Frameworks' tab.

Deadline extensions are also subject to availability, and companies should be aware of the resulting impact on score release dates and/or Sustainability Yearbook eligibility.

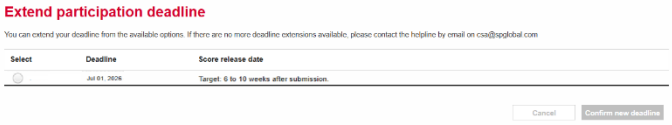

Figure 9: Selecting a deadline extension.

Questionnaires

Figure 10: Questionnaires section.

The 'Questionnaires' section is located within the CSA 'Response' section of the 'Frameworks' tab (along with Confirmation, Documents, and Taxonomy). It contains the current year's questionnaire, as well as access to all past assessments of your company. To see a prior year's questionnaire, use the dropdown indicated in the next figure to select the relevant year.

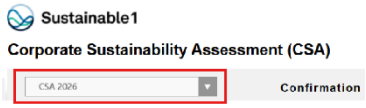

Figure 11: Dropdown to select current assessment year (or earlier assessment year) questionnaire.

For instructions on how to view questionnaires that your company has submitted in previous years (showing analyst changes), see this tutorial.

If your email is linked to more than one company account in the Sustainability Portal, ensure the correct company is selected in the dropdown indicated below.

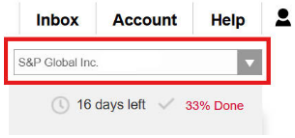

Figure 12: Company selection dropdown

Getting Started

The 'Questionnaires' section provides access to the current year's assessment and stores all questionnaires pertaining to your company from previous years.

If the date of the participation window your company selected has not yet been reached, you will not be able to work on the questionnaire. A message will be displayed prompting you to wait until the start date of the participation window.

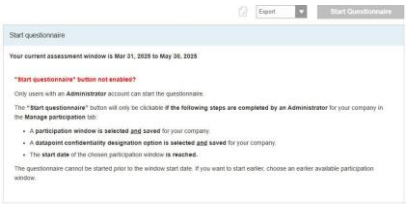

Figure 13: Prompt for company to wait for start date.

Once the start date of the participation window has arrived, and you have selected a data point confidentiality designation, the 'Start questionnaire' button will be activated. Once you click on the button, you may begin editing the questionnaire within the Portal.

You may, however, view the questionnaire and download a copy from the Portal at any time after the start of the 2026 CSA on April 1st (see Figure 18).

General Navigation

Questionnaire content is displayed in a tree structure consisting of three dimensions: Governance & Economic, Environmental and Social, and sub-levels called criteria that contain questions belonging to the same topic.

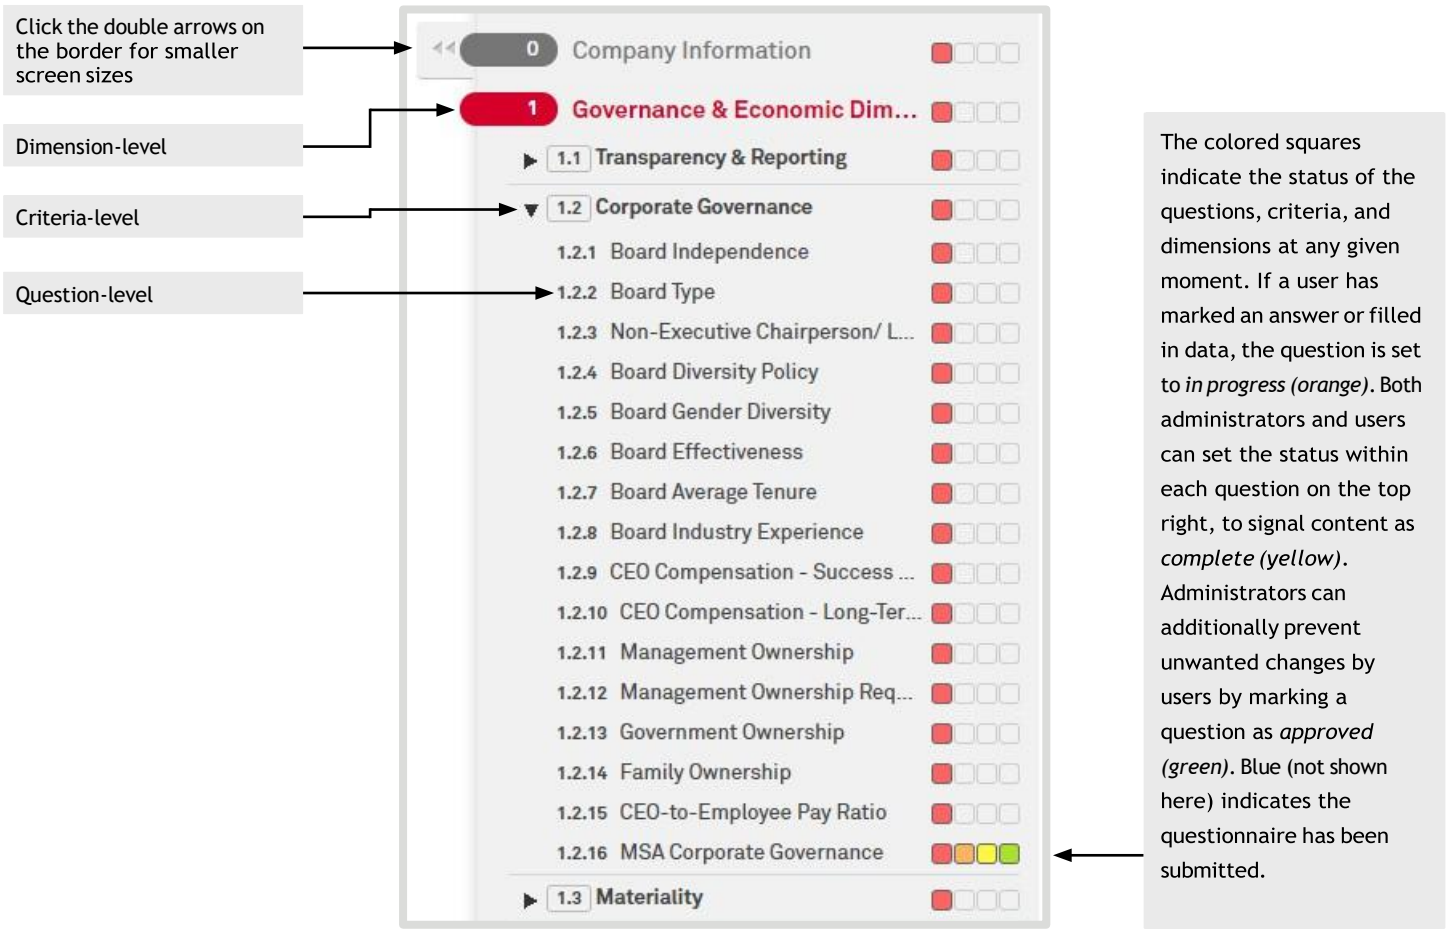

Figure 14: Questionnaire tree structure.

Changing a Question Status

Administrators are able to utilize both 'question completed' and 'question approved' statuses and can revert an 'approved' status back to 'completed' and/or 'in progress. Users may revert a question from 'completed' status to 'in progress'. This is done using the series of buttons that appear above the banners within the questionnaire. Hovering over each icon will show tooltips explaining their functionality.

The status of each question can only be changed individually- it cannot be done in bulk. The approval function enables the company administrator(s) to quality check the answers internally and this status does not impact your ability to submit the questionnaire – i.e., utilizing this feature is not necessary to submit the questionnaire.

Figure 15: Question at 'in progress' (marked orange) status (1) with the option to mark it as 'completed' and 'approved' (2). See list of icons in the image below.

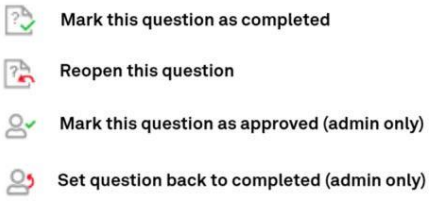

Figure 16: Status change icons.

CSA Completion Status

Figure 17 below shows the indicator with time left to complete the questionnaire by the deadline (e.g., 7 days left) and the completion status information in percentage (e.g., 96% Done).

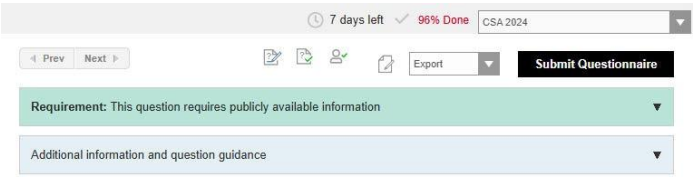

Figure 17: Tracking completion status.

The completion status (% Done) is calculated as a ratio between how many transitions between the different stages have occurred, and how many are needed to have everything 'Approved'. It is calculated as the average status of the answers, which is between 0 and 3 (referring to these statuses: 'Not Started', 'In Progress', 'Completed', 'Approved' that are visualized by the colored boxes).

Example: A questionnaire of 50 questions needs 150 stage transitions in total (i.e., 50 times three status changes). Having everything 'Completed' (all questions have a yellow status box) means that 50 questions were moved first to 'In Progress' then to 'Completed', i.e., 100/150 = 66%.

Generate a PDF of the Questionnaire

It is possible to generate a PDF document of the questionnaire, with the option of including your answers, the question rationale, and definitions. This document may be printed, or a read-only version may be shared with internal stakeholders.

Please note that we are not able to offer a Microsoft Word or Excel document of the questionnaire.

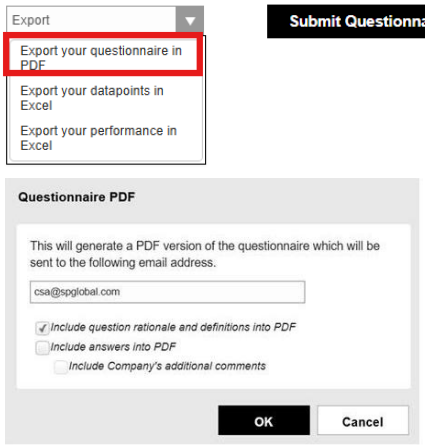

Figure 18: Generating a PDF of the questionnaire.

All companies are required to complete the web-based questionnaire and submit it to S&P Global electronically through the Portal. Some companies may wish to reference the PDF version of the questionnaire to complete it offline first before transferring the information to the Portal. We recommend using the Portal and, if necessary, providing online access to your colleagues to complete the questionnaire in the system. This way they will have the best access to all supporting information and question guidance.

Prefilling the Questionnaire with Data

If your company submitted an assessment in previous years or was assessed by S&P Global based on publicly available information, you can utilize the prefill icon to automatically import answers into this year's questionnaire. This function is available both for individual questions (1; users and administrators can select this option) as well as for the entire questionnaire (2; only administrators can utilize this functionality). Prefilling can significantly reduce the workload.

There will be a few scenarios where it will not be possible to prefill data. If your company has a CSA Score from last year, or you were informed that analysts have assessed your company using publicly available information for the current assessment year, and you are not able to prefill, please contact the Corporate Engagement Team.

When utilizing the prefill functionality, related references are made available in the 'Documents' section and are also referenced at the bottom of each question.

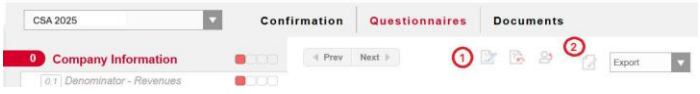

Figure 19: Prefill icons for individual questions (1) as well as for the entire questionnaire (2).

Please note that prefilling at the question-level (1) will overwrite the current answer, however prefilling at the questionnaire-level (2) will not overwrite questions that had been answered prior to execution of the prefill.

The following pop-up window will provide you with options for the prefill (where available). Options are verified information of your company's own CSA submission or S&P Global's assessment of public data on your company.

You may review or overwrite any of the information prefilled in the question with updated information as applicable. Please ensure to follow the question guidance provided.

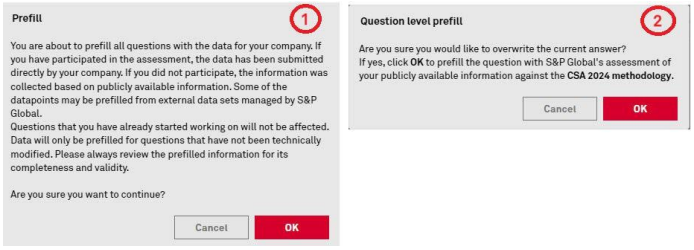

Figure 20: Pop-up windows when prefilling a question (1) or prefilling the entire questionnaire (2).

Submission

Any administrator may submit the completed questionnaire, thus finalizing the assessment. Selecting the 'Submit Questionnaire' button (see button in Figure 21 below) will present you with a final confirmation pop-up box that includes the submission approval form. You need to accept the conditions in order to complete the submission (see Figure 22).

Figure 21: Submission button.

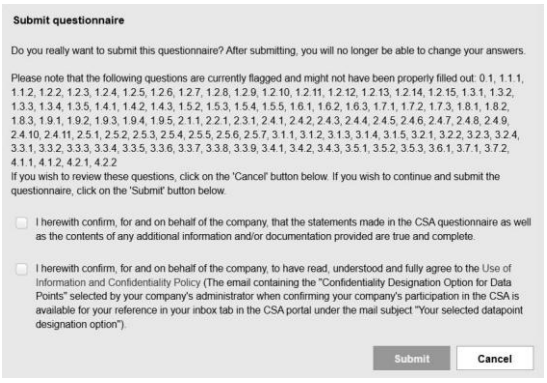

Figure 22: Submission approval.

When going back through any questions that are noted in Figure 22, you will want to make sure that any data noted in boxes that have orange coloring (such as in Figure 35) are accurate. They have been flagged automatically by parameters set up within the Sustainability Portal to alert users to potential mistakes.

Questions

The questionnaire is laid out with several recurring types of tick boxes, input fields, document attachments, and comments. In addition, each question always has a Not Known or Not Applicable option.

If you believe that a question may not be applicable to your company, please contact the CSA Helpline, csa@spglobal.com with the question number and the rationale for selecting the Not Applicable option AFTER you begin the questionnaire. This way, we can review justification for the claim with you. Any 'Not Applicable' selections submitted without prior agreement will be carefully evaluated and those deemed irrelevant will be modified to an appropriate option.

For each question, there is introductory text, giving context and specifying what is being asked.

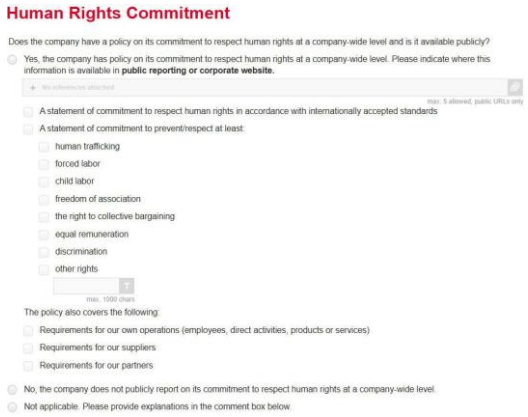

Figure 23: Example of question layout 1.

You may need to select a radio button to activate the ability to enter information (see Figure 25). Inactive input elements will be shown in light grey (see Figure 24). Active parts will be highlighted in dark grey (see Figure 25).

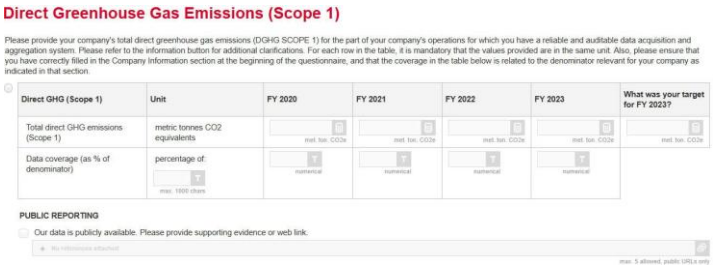

Figure 24: Example of question layout (inactive).

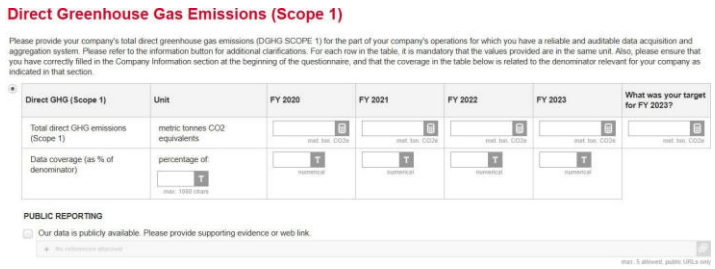

Figure 25: Example of question layout (active).

Saving a Question

Once you have finished filling out a question, you can save the answer on our CSA Portal server. While this is done automatically every time you switch between questions, for further control, we provide a save button at the bottom of the page, along with the ability to cancel your current changes, or to reset the question completely to its empty status.

Figure 26: Question options.

When the Portal is closed without first logging out, the question you were working on previously may be locked from editing when you log back in. This is to prevent any other user from making unwanted changes to the question you were working on in the event that you are unexpectedly logged out. If this happens, please wait 20 minutes before trying to work on that question. After this period, the question will be available for editing again. Other questions will remain editable during that time. To prevent this from occurring, we advise you to always log out of the platform if you intend to be away from your computer for an extended period. If you are unable to edit the question after the 20-minute wait, please contact the CSA Corporate Engagement Team.

Unit Converter

Several input fields request data in specified units. We have integrated a unit converter within certain questions which allows you to provide the data in the units of analysis used for reporting within your company. For example, if we ask you to provide figures about your purchase of electricity in megawatt hours (MWh) but your company only reports electricity figures in gigajoule (GJ), you can provide the figures in this unit instead. The unit converter will automatically convert your data into MWh.

If you wish to provide your data in a different unit than the default one asked for, click on the calculator in the text box and choose your preferred unit in the drop-down list. Insert the figure and click 'ok' to validate the conversion. If you wish to learn more about the unit converter and the formulas that we use for conversion, please refer to the unit converter table in the CSA Methodology Handbook.

Please note that some of the unit conversions from the table are available in the unit converter calculator, but not all of them. If your data is in different units of analysis than requested in the questionnaire and the question does not offer a unit converter, please contact the CSA Corporate Engagement Team for advice on how to proceed. In such a case, it might not be possible to report in a different unit.

Figure 27: Calculator icon example.

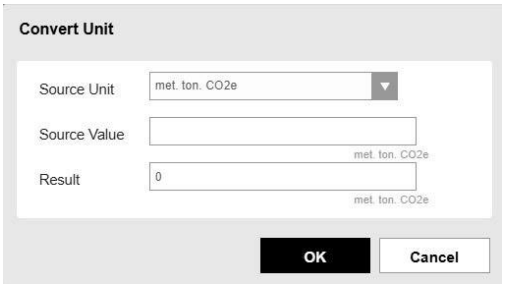

Figure 28: Unit conversion example.

Banner – Additional Information and Question Guidance

Always review the information under the light blue banner before answering a question. Clicking on the black arrow expands the box to reveal the rationale, data requirements, and key definitions for the question.

Figure 29: Information banner.

These informational sections should answer all inquiries you might have for a certain question. Should you have additional questions or wish to further clarify how the question methodology applies to your specific business context, please contact the CSA's Corporate Engagement Team.

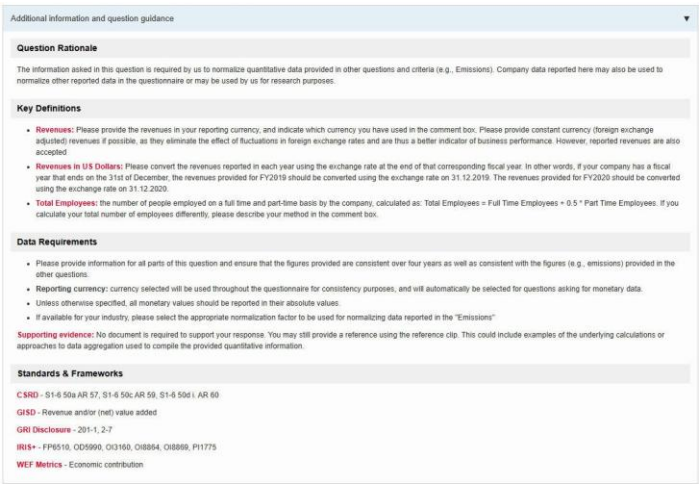

Figure 30: Information banner expanded.

Banner - Questions Requiring or Rewarding Public Disclosure

Questions that require publicly available information, or where full credit can only be awarded with publicly available relevant information, are clearly marked at the top of the question by a green banner.

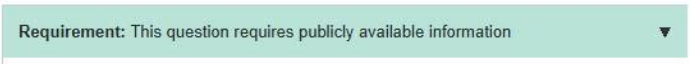

Figure 31: Banner indicating requirement of publicly available supporting information for question.

Questions requiring or rewarding public information have a different behavior with regards to prefilling and adding references.

For questions where only publicly available references are accepted, you will only be able to provide a web link (and not a document) as evidence. Please attach the link which leads directly to the document, in addition to including the URL of the webpage that hosts the document.
For example, the document, 'S&P Global ESG Scores Methodology' is available at this link: https://portal.s1.spglobal.com/survey/documents/spglobal_esg_scores_methodology.pdf
And this is the URL for the website where the document can be found:
https://www.spglobal.com/esg/csa/policies-guidelines
In addition to providing the URL, you may upload a copy of the public document to the 'Documents' section within the 'Frameworks' tab if you wish.

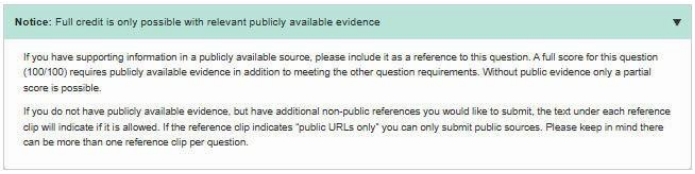

Figure 32: Example of banner text for questions granting additional credit for publicly available supporting information.

Banner - Questions That are Not Scored

There can be questions within the CSA that are informational in nature and as a result are either not scored or the resulting score does not factor into your company's calculated CSA and ESG Scores. Within these questions you will note an orange banner at the top of the question.

Figure 33: Banner indicating the question isn't scored.

Warning Messages

The Portal will perform basic data-level checks on your input for some questions. These checks inform you that your entered data may be relatively high/low compared to your own past data or compared to the expected range for this data value, or that more data in a time series is needed. A warning message will appear when you try to save the question or move to another question. If the data you entered is in fact correct, you can choose to ignore the warning message. We encourage you to add a comment that would explain any deviation of your data within the 'Confidential Additional Comments' text box.

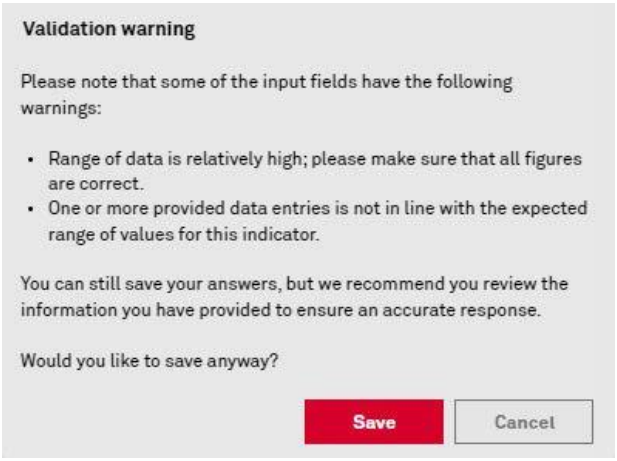

Figure 34: Example of a warning message.

In addition to the warning message, the field in the question will be highlighted (see Figure 35). In the example below, it could be difficult to see that the data for the second year has been entered in the wrong order of magnitude (i.e., a multiple of ten of the other values), which could be a typo. In this case, the value is highlighted to encourage you to review your answer.

Figure 35: Example of in-question warnings.

Adding References

Some questions require supporting evidence. Wherever applicable, this will be mentioned in the question text and indicated with a paperclip icon (see Figure 36).

Figure 36: Reference clip.

Selecting the paperclip icon opens a dialogue window allowing you to attach an existing reference (i.e., already uploaded to the Portal) or attach a new reference. When attaching a file, you will be asked to provide a page number that refers to the location of the information needed in the context of that question.

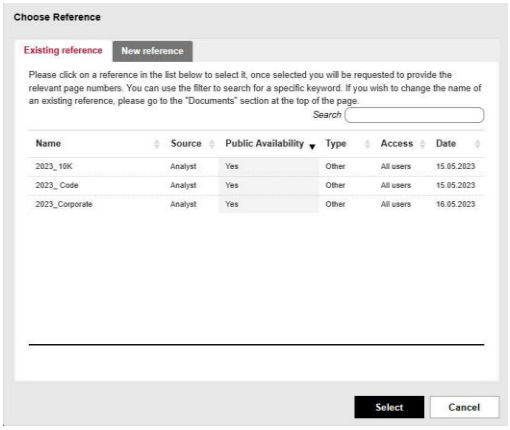

Figure 37: Reference pop-up box (existing reference).

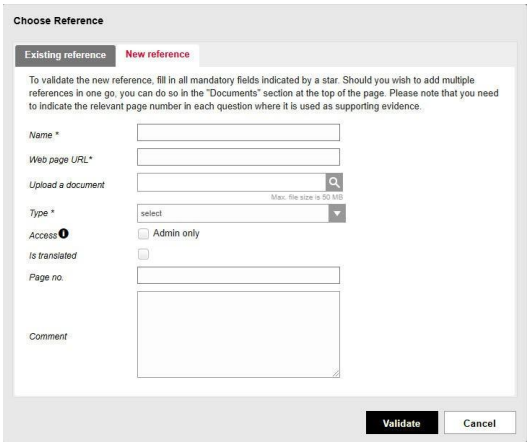

Figure 38: Reference pop-up box (new reference).

Please make sure you are as specific as possible in referring to the location of the information that you deem relevant to the question and refrain from adding information that is only partially relevant, or not at all relevant to the answer to this question. This, in addition to precise page numbers (i.e., the PDF page number(s) rather than the printed page numbers on the document (if they differ)), will best allow our analysts to assess your answer.

Documents can be marked as confidential by setting their access as 'Admin only'. The 'Admin only' documents can only be viewed and downloaded by an administrator. All other documents are 'All access' and can be viewed by anyone with a user account. Users cannot open or download documents set as 'Admin only'. Both newly added documents, as well as the historical documents can be marked as 'Admin only.

In addition to the source, users can add the type of document (Annual report, Sustainability report, etc.). When adding a new reference, please be aware that Name, Web page URL, type and page number (if it's a document) are mandatory fields.

As described previously, some questions only allow adding a public reference. In this case, hint text appears underneath the paperclip icon, e.g., 'max. 5 allowed, public URLs only'. The 'Choose reference' pop-up will show the field 'Web page URL' as mandatory. If the element does not require a public reference, the user is free to upload a physical file, paste a URL or both. If you are unable to upload a document, first check if the question requires a URL to the reference. If documents are allowed, the problem may be that you are connected over a proxy server that does not allow uploads. Please check with your company IT department first to find a solution. If the problem persists, please contact our CSA Corporate Engagement Team.

The number of references that can be uploaded per question is limited to ensure that supporting evidence remains relevant and specific.

- You will still be able to prefill all documents or references from the previous year. A warning will appear upon saving a question where the maximum number of references has been exceeded. However, all documents and references from the previous year will be prefilled.
- Editable answers to questions with too many references introduced during prefill will be highlighted.
- The online questionnaire will provide you with a warning message both upon saving the document and upon submitting the questionnaire if you have exceeded the document limit in any question (see Figure 39). Please review all documents and only attach those that are specifically linked to the answer you have provided.

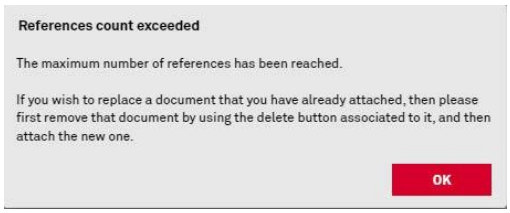

Figure 39: Pop up box when references count is exceeded.

Please be aware that additional links to documents provided in the company comment box may not be considered in the analysis of the question.

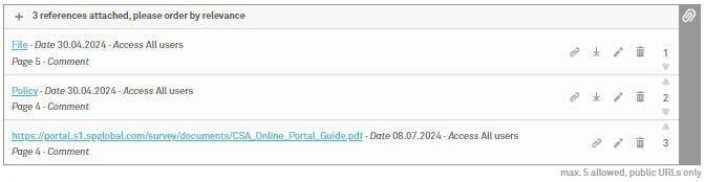

Figure 40: Companies can also order the references according to priority / importance / relevance.

We encourage you to order the attached references according to priority/importance/relevance. As previously noted, the number of references is limited with the intention of reducing reporting burden on companies. Therefore, of those maximum references submitted, you can now highlight which documents are the most relevant.

References Added by Analysts

At the bottom of a question, you may see a table showing any documentation that was used by analysts to verify a response to that question in the prior year. This is provided as an indication of where that relevant information may also be provided for this year's assessment and does not eliminate the need for the company to attach relevant references for that question.

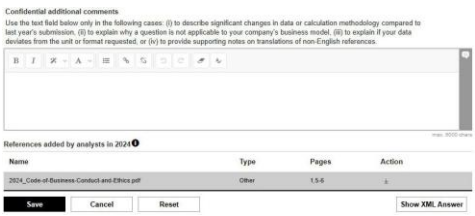

Figure 41: Reference added by an analyst shown at the bottom of a question.

Documents

Figure 42: Documents section.

In this section, you can upload documents separately or in bulk. The entire collection of attached documents, both past and present, can be managed within the 'Documents' section. You can rename, download, or delete all* documents for one participation. Each document can be referenced multiple times. While there is no limit to the number of documents you can upload, there is a size limit per file of 50 MB.
*Deleting the document will be disabled for any documents that are referenced in at least one question within a participation. You can see how many questions a document is attached to through the number in the References column.

Other documents might also appear in this tab, acquired from different sources, namely:

- Analyst: Documents uploaded by S&P research analysts during a previous relevant assessment. These documents will be carried over to the current assessment during the prefill process.
- S&P Global Market Intelligence: Public documents collected by the S&P Market Intelligence team. All available relevant documents are automatically added when the participation is confirmed. Users can attach these documents within questions as references, but they are not able to edit or delete them.

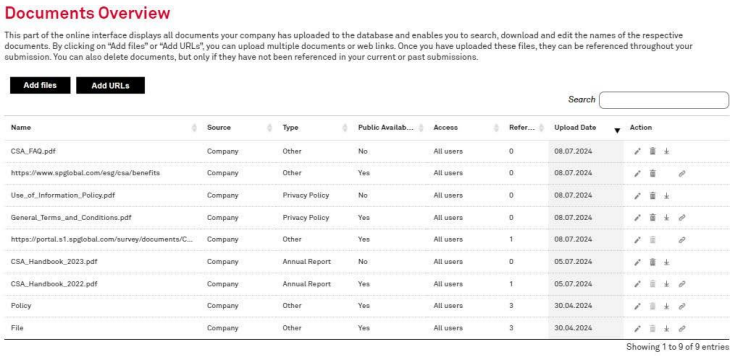

Figure 43: Documents Overview section.

Documents Columns

- Name: The name of the document or URL that was added to the Portal.
- Source: Options are Company or Analyst. This indicates who uploaded the reference to the Portal.
- Type: When adding a reference, you can categorize it to indicate what the file/URL is- e.g., sustainability report.
- Public Availability: Options are Yes or No and indicates if the reference is available publicly. Only if the reference is a URL will it be labeled 'Yes'.
- Access: By default, all users can see all documents. Each document's permission can be either 'All users' or 'Admin only'. 'Admin only' documents are visible in the document overview for all users but are not downloadable for the other users. Only an administrator will be able to download them. Only administrators can choose for a file to be Admin Only when it is uploaded to the Portal. URLs cannot be set as 'Admin only'. If a user also has access to a question containing a reference to a confidential document, they will also see any comment provided on this reference.
- References: This column indicates how many times the file or URL has been added as a reference within the CSA questionnaire. If a file has been referenced at least once, it cannot be deleted from the 'Documents' section.
- Upload Date: This is the date when the file or URL was added to the Portal.
- Action: Edit, delete, replace the file, download, or open URL.

Adding Files or URLs

Within the 'Documents' section, you can add files or URLs that can then be linked to relevant questions within the assessment. Both can be uploaded individually or in bulk from this location.

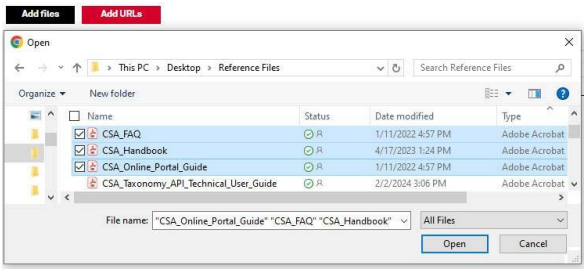

Figure 44: Adding multiple files.

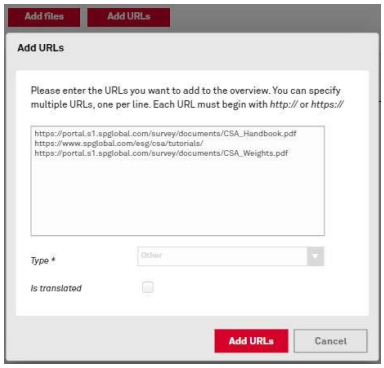

Figure 45: Adding multiple URLs.

Benchmarking

Figure 46: Benchmarking option in dropdown.

In this section, you can benchmark your company against its industry peers. Within the Benchmarking section are four subsections: 'Database', 'Index Membership', 'Reports', and 'Leverage S&P Global'.

Figure 47: Database, Index Membership, Reports, and Leverage S&P Global sub-sections.

Database

Within the Database, you can identify your company's yearly changes for both the score and percentile ranking for each of the criterion. You may also view the weighted gap between your score and the best company in your industry, and how closing this gap would impact your company's total CSA score.

You can also view a four-year trend analysis of your company's performance when you select the black arrow next to the Total Score, or one of the Governance & Economic, Environmental, or Social dimension lines. In this same view, you will be able to see the top five performing companies within your industry as well as the four companies in your industry group with a score closest to your own.

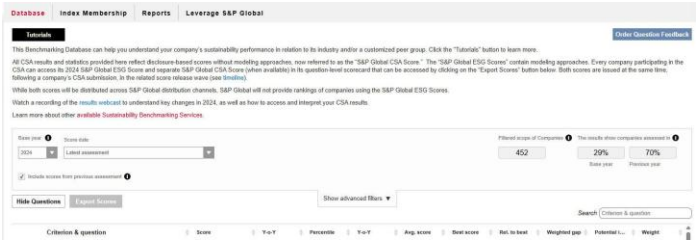

Figure 48: Example view of Benchmarking Database.

Figure 49: Example view of Benchmarking Database.

Based on your service package, different filters and functionalities are available within the Database. Watch the tutorial videos available for the different versions of the Benchmarking Database.

Index Membership Section

In this section, you can identify how your company performs against index constituents, specifically the Dow Jones Best in Class Index (formerly DJSI). Here you will see the score for index selection within your designated industry, and if applicable, index memberships for the selected assessment period.

Key index statistics, as well as an overview of your industry's index members in the selected assessment year, are also displayed.

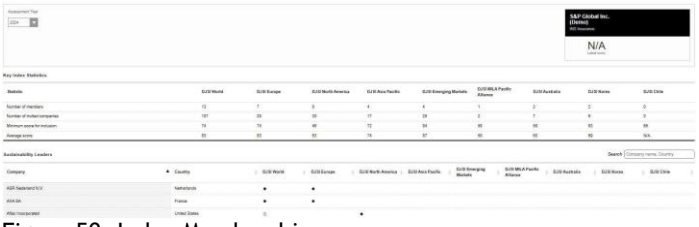

Figure 50: Index Membership.

Reports

This section is a repository for your assessment results. Dow Jones Best-in-Class Indices-invited companies can access a PDF of their Benchmarking Scorecard for each finished assessment, and all companies can access past MSA reports if there were any cases that impacted your company's score from 2015 to mid-2024. Any ESG Score reports will also be found within this section of the Portal.

You can also order a Feedback Report from the Sustainability Benchmarking Services team based on your company's last submission. More information is available by clicking the 'Order Feedback Report' button.

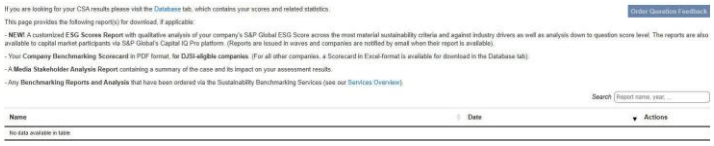

Figure 51: Reports.

Leverage S&P Global

S&P Global offers a wide range of sustainability platforms and services, which you can become familiarized with through this page and request demo access where interested.

S&P Global Capital IQ Pro provides data, news, and research, combined with tech-forward productivity tools.

Peer Practices

Figure 52: Peer Practices option in dropdown.

In this section, peer practice examples are provided to illustrate good business practices in areas related to the questions in S&P Global Corporate Sustainability Assessment. With a paid subscription to the Peer Practices Database, the filters and functionalities are made available to Sustainability Portal users. Watch the tutorial video.

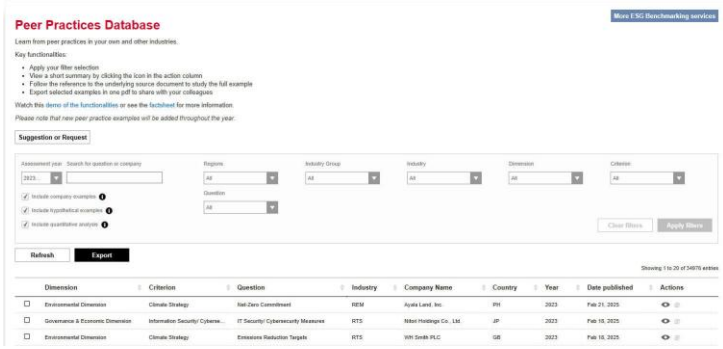

Figure 53: Peer Practices Database.

MSA

Figure 54: MSA option in dropdown.

This tab is only visible for administrator accounts and users who have specifically obtained permission from an administrator. In this tab, you can access Media and Stakeholder Analysis (MSA) cases in which we focus on issues that might affect your company's reputation and, eventually, have a material impact on its financial performance.

Figure 55: Media and Stakeholder Analysis section.

If the section is empty or does not include any cases with an 'Open' status, no action is required from your company.

Once you have completed the information request for an open MSA case, please select the 'Submit' button at the bottom of the page. In case you have more than one case, please 'Submit' each case separately. Once you have submitted a case, the case status will show as 'Submitted' and you will not be able to edit your response further.

Once the assessment cycle has ended, the status of cases for which you have provided an answer will appear as 'Closed'. Cases for which the response deadline has passed, and no response was provided, will appear as 'Expired'.

All MSA cases (after 2017 and prior to August 2024) affecting your score will be displayed in an MSA report, available in the 'Reports' sub-section of the Sustainability Portal (within the Benchmarking tab).

As of August 2024, MSA reports are discontinued, but the MSA details are provided within the ESG Scores report which is also in the 'Reports' sub-section of the Sustainability Portal. If your company was contacted regarding a case prior to 2017, the response will not show in the MSA section, as correspondence took place via e-mail.

For additional information, please see the MSA Methodology Guidebook.

Inbox Tab

Figure 56: Inbox tab.

Within this tab, your team can see key communications from S&P Global's CSA team, organized by year. To see a copy of the email, select the icon with 3 lines under the 'Actions' column.

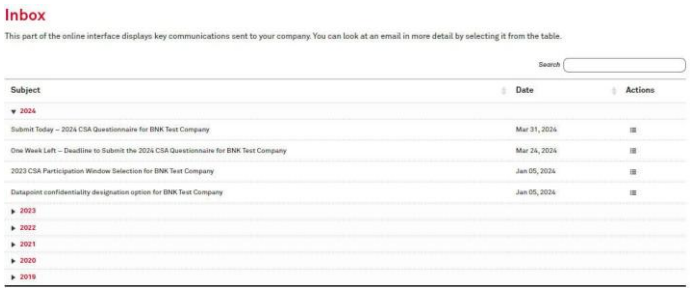

Figure 57: Inbox communications view.

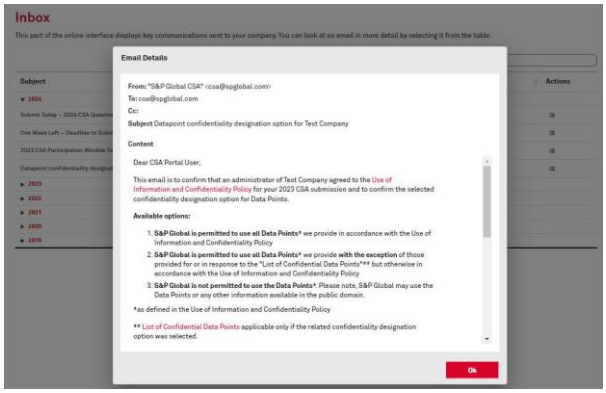

Figure 58: Email details view.

Account Tab

Figure 59: Account tab.

This section allows the company administrator(s) to add, manage and delete additional admins and users. Each user can be assigned to different questions of the current and past questionnaires, or tabs of the Portal. This allows the admins to distribute relevant questions to topic owners and experts within the organization. This section also allows you to manage notifications related to the CSA that are sent throughout the year, such as methodology changes, opening of the questionnaire, etc.

By default, all questions in both historical and current questionnaires can be seen by all users. The administrator should remove access to specific questions wherever necessary.

Upon creation of the new admin or user, and e-mail will be sent to the specified e-mail address, which will include information on how to set up password.

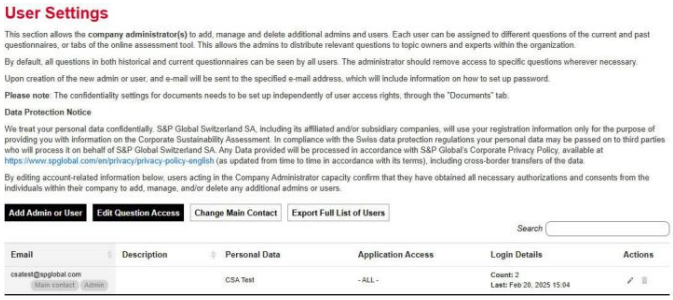

Figure 60: User settings.

Creating New Administrator or User Accounts

In this tab, you can create and manage any number of administrator (admin) or user accounts. This functionality allows for maintaining confidentiality for some answers and for the distribution of questions among relevant departments and colleagues.

Administrators are responsible for managing the company's account. Each admin will see the entire questionnaire and all of the Portal tabs and associated sections. Each user can be assigned to any combination of individual questions, as well as the sections (e.g. MSA). These users cannot confirm or submit the questionnaire, edit questions marked as 'Approved', or manage account and user settings. By default, all questions in both historical and current questionnaires can be seen by all users. The administrator should remove access to specific questions wherever necessary. *Please note: The confidentiality settings for documents needs to be set up independently of user access rights, through the Documents section.*

When setting up a new role, an administrator specifies the user type (admin or user), e-mail address, title, last name, first name, phone, department, and function/position. An unlimited number of admins and users can be added. Each role needs to have a unique e-mail address. Once a new role is created, they will be notified via the specified email address that a new account has been created for them, and they will need to follow instructions to set up their password.

S&P Global is using Okta to authenticate, authorize and secure access to its application. If you are a user of an additional S&P platform, e.g. S&P Global Capital IQ Pro, you will be able to log in there using your Sustainability Portal credentials.

New Users

Upon creation of an account, users will receive an email from csa@spglobal.com confirming their account creation and user ID (i.e., email address). A separate email will be sent from donotreply@spglobal.com, that contains the link to set a new password. Below is an example of the emails.

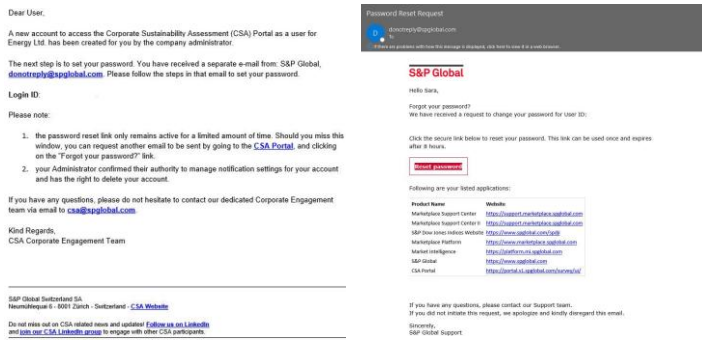

Figure 61: Sample email new account set up – password set up.

The password set up/reset page will provide guidance on the required complexity of the password.

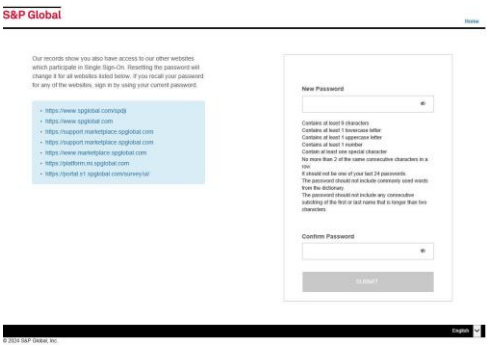

Figure 62: Password set up/reset page.

Your login and password will apply to all S&P Global applications you subscribed to (if applicable). These applications will be listed on the confirmation page.

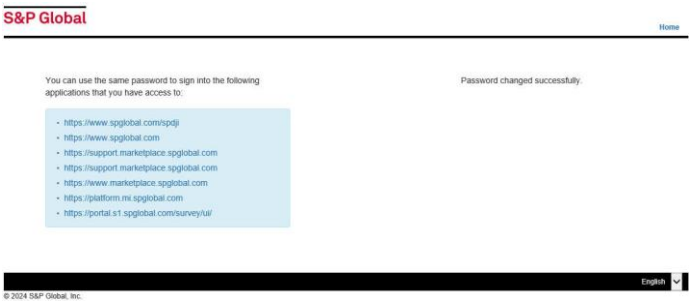

Figure 63: Password changed confirmation page.

Users with Access to More Than One Company Account in the Sustainability Portal

If the admin/user for which an account was created for one company already has an admin/user account for another company account on the Sustainability Portal, they will not need to reset their password, but will rather be notified via mail that a new company has been made available to them. You can switch between companies within the Sustainability Portal using the dropdown menu that appears at the top of the right-side navigation panel.

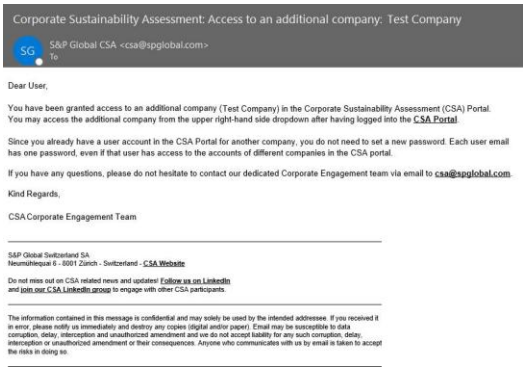

Figure 64: Email notification of additional access.

Differences Between Administrators and Users

The tables below summarize the tasks admins and users can execute. It is organized in sequential order by each stage a company will go through when completing the CSA:

Preparing for the CSA			
Task	**Admin**	**User**	
		By Default	*With Authorization*
Confirm company's participation in the CSA	✓		
Save a company's data point confidentiality designation	✓		
Create, edit and delete admin or user accounts	✓		
Manage other admins, users, contact information and company details	✓		
Manage own contact details and notification settings / preferences	✓	✓	
Manage company subscriptions and services	✓		
Manage anyone's notification preferences	✓		

Your Participation			
Task	Admin	User	
		By Default	With Authorization
Access 'Questionnaire' and 'Documents' sections in the Portal	✓	✓	
Prefill the entire questionnaire from the most recent assessment data available	✓		
Prefill a question within the assessment from the most recent assessment data available	✓	✓	
Upload documentation and supporting evidence	✓	✓	
Restrict or allow access to users to sections within the Portal	✓		
Edit any questions within the questionnaire ('Not Started' or 'In Progress' stage) when access has not been restricted	✓	✓	
Designate and revoke user access to specific CSA questions / criteria. *Please note: Users that have NOT been granted access to a question will still be able to access any document linked to it unless marked 'Confidential' in which case only admins will have access.*	✓		
Edit assigned questions within the questionnaire ('Not Started' or 'In Progress' stage) when access has been restricted			✓
Push a question from 'In Progress' to 'Completed'	✓	✓	
Push a question from 'Completed' back to 'In Progress'	✓	✓	
Push a question from 'Completed' to 'Approved'	✓		
Push a question from 'Approved' to 'Completed'	✓		
Submit the questionnaire	✓		

S&P Global's Assessment			
Task	Admin	User	
		By Default	With Authorization
Download the completed questionnaire	✓		✓

Analysis of Results			
Task	Admin	User	
		By Default	With Authorization
Review the assessed version of the questionnaire	✓		✓
Download company benchmarking scorecard (a user can only do this if they have been granted access to the Benchmarking Database)	✓		✓
Access 'Reports' from the Benchmarking section	✓		✓

Managing Admin/User Accounts

Each account can be edited or deleted by the administrator (with the exception of one's own account). Admins can, at any time, revoke access rights to a user by deleting the user. There is no option to set up a temporary user.

By continuing to the Sustainability Portal, users acting in a Company Administrator capacity confirm that they have obtained all necessary authorizations and consents from the individuals within their company to add, manage, and/or delete any additional admins or users. You are able to download an Excel copy of your company's administrators and users for reference.

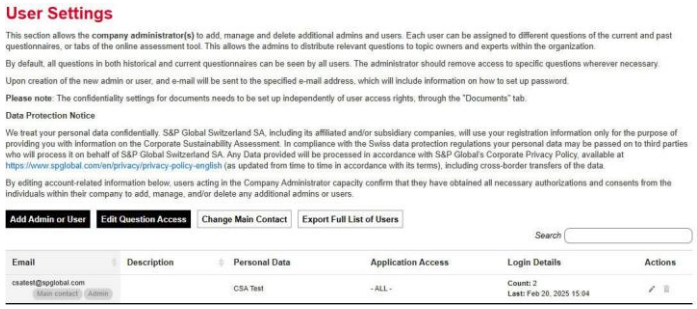

Figure 65: Manage user accounts.

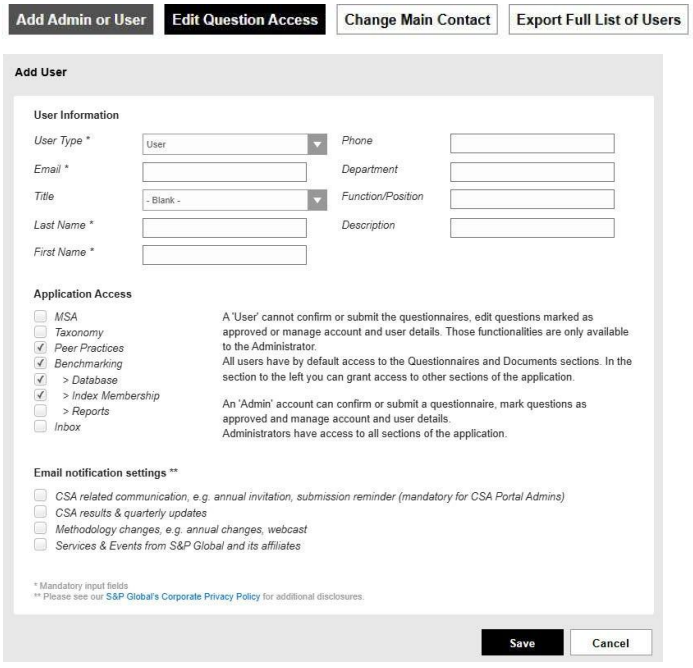

Figure 66: Add a user/ admin.

Editing Question Access

Administrators have an overview of the full list of questions that can be assigned to a user. Approving access for a user to all questions within a certain criterion can be done in bulk; criteria headings appear in red and selecting the associated tick box will select/unselect the questions within that criterion.

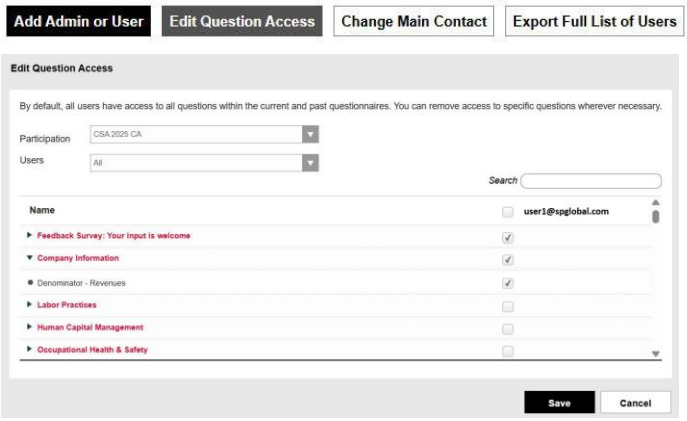

Figure 67: Edit user question access.

A user with removed access for particular questions will still be able to see all questions within the entire questionnaire, but not any answers input by other users or administrators: the questions which are not assigned to the user will be indicated by a 'lock' icon and will be non-editable. In the PDF download, the same logic will be applied: the entire questionnaire will remain visible, but answers will be visible only for questions which are assigned to this user.

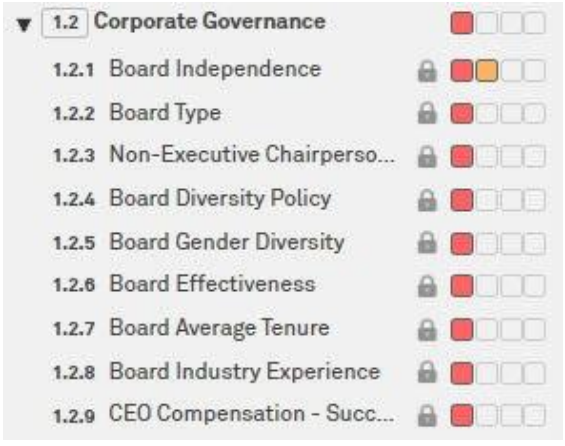

Figure 68: View for users with restricted question access.

By default, all newly created users have access to all questions and all documents. Once the user access has been set up, the same rights will be applied for the next year's assessment year. Any new questions will be available by default to all users.

By default, all questions and answers of the previous CSA questionnaires submitted by the company are visible to all users: administrators can restrict the historic questions visible to specific users.

Administrators can set up document confidentiality from the 'Documents' section by marking them as 'Admin only'- restricting question access for a user does not automatically restrict access to any associated document(s).

Once a user or administrator marks a question as 'Completed', the question becomes 'read-only'. Both users and admins can set this question back to 'In Progress' and edit it again. Once an administrator has marked the question as 'Approved', other users will not be able to edit those questions anymore, and the questions become 'read-only'. It is not possible to set up a read-only user.

Changing the Main Contact

Each company needs to assign one administrator as the main contact. There can only be one main contact, but an unrestricted number of administrators.

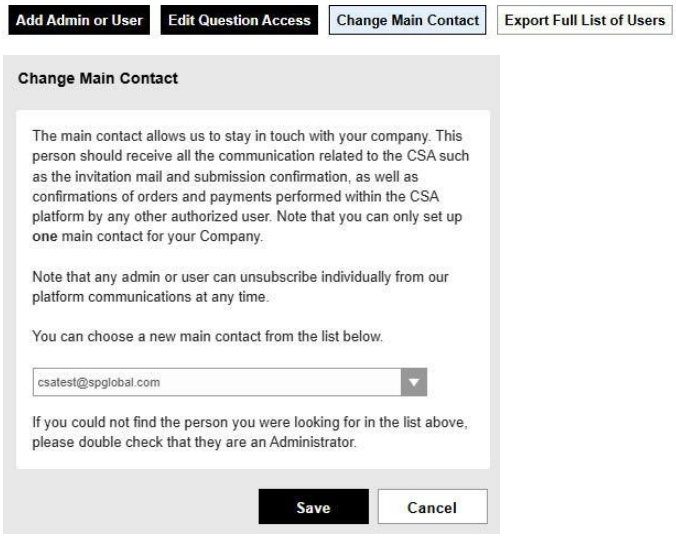

Figure 69: Change the main contact.

Export Sustainability Portal Users

By selecting the option shown in Figure 70, an Excel file download is initiated that provides a full list of those with User and Administrator access to your company's Sustainability Portal account. We suggest that administrators review this list at least once per year to identify necessary changes to access.

Figure 70: Download user list from Portal.

Company Settings

The Account tab enables you to also manage your company information.

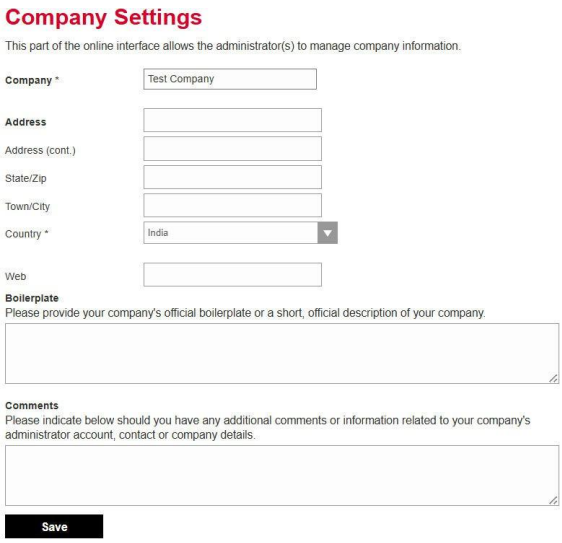

Figure 71: Edit your company details.

Subscriptions

Administrators have access to subscriptions, which contains the services received from Sustainability Benchmarking Services at S&P Global.

Figure 72: Subscriptions.

Help Tab

Figure 73: Help tab.

This tab provides an overview of resources available in the right side panel within the CSA section of the Portal.

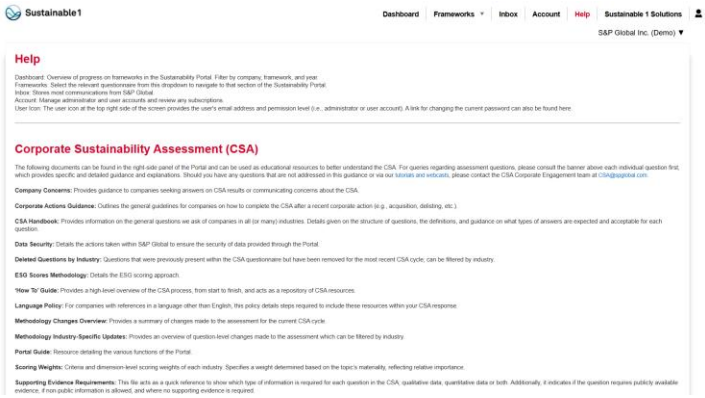

Figure 74: Overview of resources in side panel.

Profile

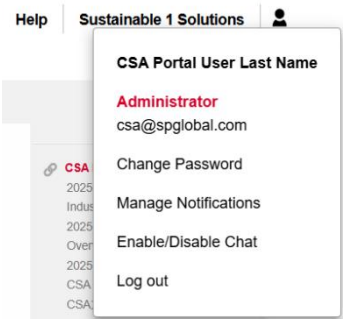

Figure 75: User profile menu.

By selecting the icon in the top navigation menu, a submenu will appear. First, this submenu will detail the account access level associated with the login details (i.e., administrator or user access associated with the email address used to log in). From there, it will provide options for the administrator or user to manage its own account preferences.

Change Password

Selecting the change password option will bring the user to the screen shown below. Follow the guidance provided via email to change the password associated with this email address.

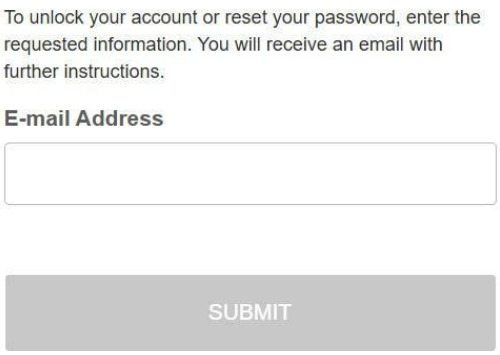

Figure 76: Resetting a password when already logged in.

Manage Notification Preferences

Both administrators and users can edit their own notification preferences by selecting the manage notifications option within this menu. Please note that by default, administrators are required to have the first notification option selected.

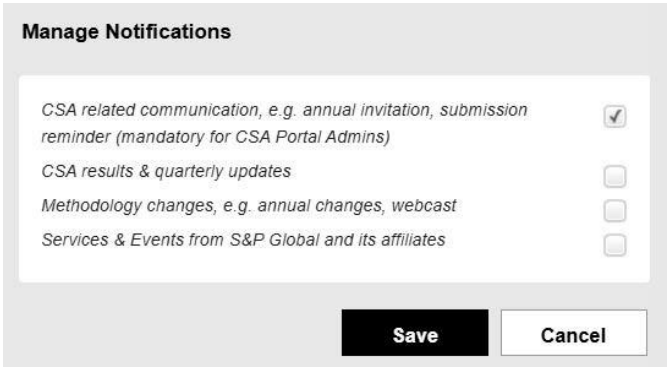

Figure 77: Managing notifications menu options.

Enable/Disable Chat

The Help Chat function can be enabled or disabled for each user account when logged in. After selecting 'Enable/Disable Chat', a pop-up window will appear to:

- Allow the use of chat box by clicking on 'Enable'.
- Reject the use of chat box by clicking 'Disable'.
