Introduction

This document provides essential information on the components of the Labor Management Key Issue to enable users of ESG Ratings to understand how MSCI Sustainability & Climate's (MSCI S&C's)[1] outputs are determined. Labor Management is a Key Issue in the Social Pillar of the MSCI ESG Ratings model. Companies are evaluated on their ability to engage, incentivize, and develop a large and complex workforce, taking into account workforce size, labor intensity, and geographic footprint.

For additional details on the MSCI ESG Ratings Model, refer to The Data, ratings and scores section of "ESG Ratings Methodology."

Exhibit 1: MSCI ESG Key Issue hierarchy

3 Pillars	10 Themes	33 ESG Key Issues
Environmental	Climate Change	Carbon Emissions
		Climate Change Vulnerability
		Financing Environmental Impact
		Product Carbon Footprint
	Natural Capital	Biodiversity & Land Use
		Raw Material Sourcing
		Water Stress
	Pollution & Waste	Electronic Waste
		Packaging Material & Waste
		Toxic Emissions & Waste
	Environmental Opportunities	Opportunities in Clean Tech
		Opportunities in Green Building
		Opportunities in Renewable Energy
Social	**Human Capital**	Health & Safety
		Human Capital Development
		Labor Management
		Supply Chain Labor Standards
	Product Liability	Chemical Safety
		Consumer Financial Protection
		Privacy & Data Security
		Product Safety & Quality
		Responsible Investment
	Stakeholder Opposition	Community Relations
		Controversial Sourcing
	Social Opportunities	Access to Finance
		Access to Health Care

[1] Sustainability and Climate products and services are provided by MSCI Solutions LLC and certain related entities. This communication is subject to the full disclaimer set out at the end of this document.

3 Pillars	10 Themes	33 ESG Key Issues
		Opportunities in Nutrition & Health
Governance	Corporate Governance	Board
		Pay
		Ownership & Control
		Accounting
	Corporate Behavior	Business Ethics
		Tax Transparency

Risks associated with this Key Issue

- Production delays due to labor unrest.
- Reduced productivity and product quality.
- Loss of growth opportunities, market share or pricing power due to damage to brand value.

Labor Management Key Issue score

The Labor Management Key Issue score evaluates the company's level of exposure to, and management of, risks on this Key Issue. The Key Issue score is based on the Exposure score and the Management score using the formula below. The Exposure score and the Management score are combined such that a higher level of exposure requires a higher level of demonstrated management capability in order to achieve the same overall Key Issue score.

$$KI_i = 7 - (\max(EXP_i, 2) - MGMT_i)$$

Where:

- KI_i is the Key Issue score for company i.
- EXP_i is the Exposure score for company i.
- $MGMT_i$ is the Management score for company i.

Labor Management: Management framework

The table below outlines the indicators mapped to their respective components that inform the Labor Management's Management score, excluding controversies. MSCI S&C assigns each indicator a default weight. Indicator weights may be adjusted at the company level to reflect the relevance of the indicator to the company's business activities. If a company has no exposure to the business activities covered by an indicator, the indicator is assigned a weight of zero.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Component	Sustainability Indicator
Labor Management Strategy score	Employee equity programs
	Workforce eligible for paid parental leave policy
	Scope of workforce eligibility for variable performance-based component to pay
Labor Management Programs & Initiatives score	Employee satisfaction survey frequency
	Restructuring policies and programs
	Skills and knowledge development training
	Support for degree programs or certifications for employees

Labor Management: Management score

The Labor Management's Management score evaluates the company's ability to manage its exposure to risks on this Key Issue. It is based on weighted average of the score associated with each relevant indicator, modified by controversies.

This score is derived from indicators that are scored on a 0-10 scale, with 10 corresponding to best practice. Refer to the Analyzing risk management section of "ESG Ratings Methodology" for additional details. Sources are company disclosures except where otherwise indicated.

The following formula is used to calculate the Labor Management's Management score - Excluding Controversies:

$$MGMT_i = \sum Indicator_Score_{j,i} * Indicator_Weight_{j,i}$$

Where:

- $MGMT_i$ is the Management score - Excluding Controversies for company i.
- $Indicator_Score_{j,i}$ is the score of indicator j for company i.
- $Indicator_Weight_{j,i}$ is the weight of indicator j for company i.

The following formula is used to calculate the scores for the components

$$COMP_{c,i} = \sum_{j \in c} Indicator_Score_{j,i} * Indicator_Weight_Scaled_{j,i}$$

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Where:

- $COMP_{c,i}$ is the component score for component c, for company i.
- $Indicator_Score_{j,i}$ is the score of indicator j for company i.
- $Indicator_Weight_Scaled_{j,i}$ is the scaled weight of indicator j for company i.
- $j \in c$ indicates that the summation is over all indicators belonging to component c.

The following formula is used to calculate the weights for the components

$$COMP_Weight_{c,i} = \sum_{j \in c} Indicator_Weight_{j,i}$$

Where:

- $COMP_Weight_{c,i}$ is the component weight for component c for company i.
- $Indicator_Weight_{j,i}$ is the weight of indicator j for company i.
- $j \in c$ indicates that the summation is over all indicators belonging to component c.

The definitions of the data points in each component are given below:

Labor Management Strategy score

The Management Strategy score evaluates the company's initiatives to provide fair and comprehensive compensation and benefits through performance-based pay, equity programs, and non-pay benefits. It is expressed as a 0–10 score, where 10 indicates strong initiatives.

- **Employee equity programs**

Definition: The extent of eligibility for an employee stock ownership plan and/or an employee stock purchase plan. Best practice is for all permanent employees to have access to such programs to participate.

- **Workforce eligible for paid parental leave policy**

Definition: Assesses the extent to which the company's workforce is eligible for material non-pay benefits, evaluated through the company's paid parental leave policies, considering both the duration of paid leave and the scope of employee coverage based on publicly available information. The industry-leading practice is when a company's paid parental leave policies cover all employees across its global operations.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

- **Scope of workforce eligibility for variable performance-based component to pay**

Definition: Indicates whether non-officer staff are eligible for variable performance-based pay, such as bonuses, and considers the scope of employees eligible for performance-based pay.

Labor Management Programs & Initiatives score

The Management Programs & Initiatives score evaluates the company's initiatives to support employees through restructuring policies, outplacement or retraining assistance, and mechanisms to gather employee feedback such as satisfaction surveys. It is expressed as a 0–10 score, where 10 indicates strong initiatives.

- **Employee satisfaction survey frequency**

Definition: The frequency of employee satisfaction surveys. Best practice is at least annually.

- **Restructuring policies and programs**

Definition: Indicates whether the company has established clear policies for employees following a restructuring or layoff, such as offering severance pay or assistance with outplacement, reemployment or retraining.

- **Skills and knowledge development training**

Definition: The extent of managerial/leadership development training. Best practice is a training program in which all employees participate.

- **Support for degree programs or certifications for employees**

Definition: The scope of the company's workforce eligible for support in pursuing degree programs or new certifications through tuition or fees reimbursement, etc.

Labor Management Exposure score

The Labor Management Exposure score evaluates the company's exposure to risks on this Key Issue. It is based on the average of the Business and Company-Specific Exposure scores, combined with the Geographic Exposure score. The Geographic Exposure score functions as a multiplier on the Business Exposure score, with an impact ranging from -50% to +50%. The Business, Geographic and Company-Specific Exposure scores are scored on a 0-10 scale, with 10 corresponding to the highest risk and 0

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

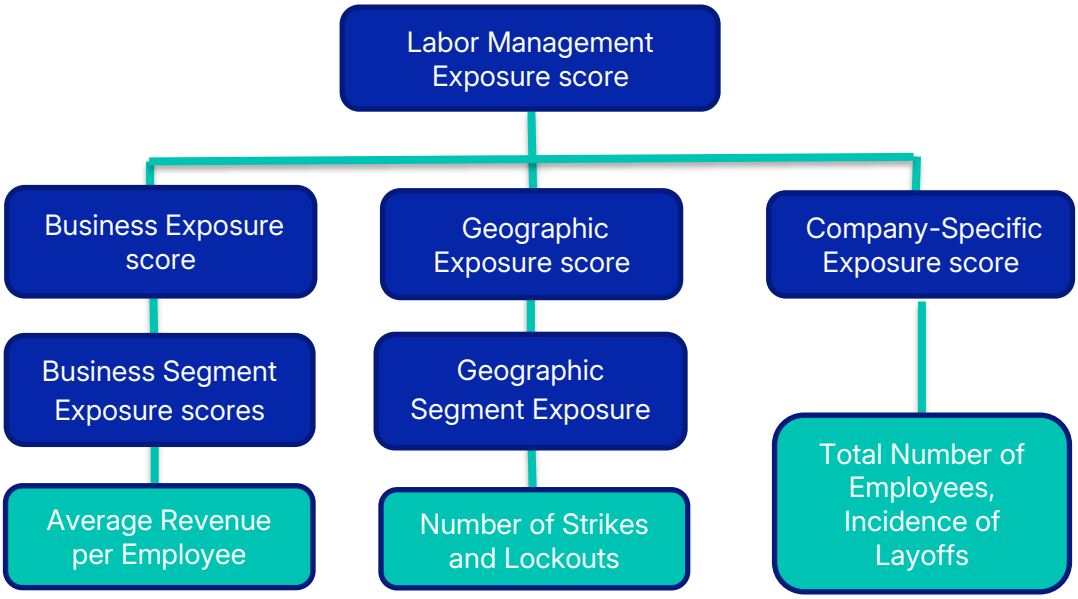

corresponding to the lowest risk. Refer to the Analyzing risk exposure section of "ESG Ratings Methodology" for additional details. The following formula is used in the Exposure score calculation :

$$EXP_{LBM,i} = \frac{BUS_{LBM,i} + COM_{LBM,i}}{2}(1 + 0.1(GEO_{LBM,i} - 5))$$

Where:

- $EXP_{LBM,i}$ is the Labor Management Exposure score of company i.
- $BUS_{LBM,i}$ is the Business Exposure score of company i.
- $GEO_{LBM,i}$ is the Geographic Exposure score of company i.
- $COM_{LBM,i}$ is the Company-Specific Exposure score of company i.

Exhibit 2: Exposure score components

Business Exposure score

The Business Exposure score is a weighted average of the Business Segment Exposure scores of a company's business segments. Scores are weighted by the proportion of a company's total assets in each business segment,[2] using the following formula to calculate the Business Exposure score:

[2] The percentage of assets is typically calculated as the company-reported asset value of the segment divided by the total asset value. In certain cases, industry-specific metrics are used to calculate the percentage of assets, such as power generation, production volume or

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

$$BUS_{LBM,i} = \sum_{j=1}^{n_i} w_{Asset,i,j} BSE_{LBM,j}$$

Where:

- $BSE_{LBM,j}$ is the Business Segment Exposure score for business segment j.
- $w_{Asset,i,j}$ is the weight of business segment j for company i based on the contribution to total company assets.
- n_i is the number of business segments of company i.

Business Segment Exposure scores

The Business Segment Exposure score of a business segment is based on a mapping of the business segment as disclosed by the company to a corresponding business activity. MSCI S&C uses the Standard Industrial Classification (SIC) system along with industry-specific adjustments to define business activities. The score associated with a business activity is used to calculate a Business Segment Exposure score. Each business activity score is determined by the Employee Revenue score of the segment.

$$BSE_{LBM,j} = ER_j$$

Where:

- ER_j is the Employee Revenue score for business activity j.

The Employee Revenue score of a business activity is calculated by using the five-year trailing average revenue per employee attributed to a given business segment, such that a lower revenue per employee gets a higher score. Business activities with lower revenue per employee tend to be more labor-intensive, resulting in a higher Business Segment Exposure score.

Geographic Exposure score

The Geographic Exposure score is a weighted average of the Geographic Segment Exposure scores of the countries, markets and regions in which a company operates. scores are weighted by the proportion of a company's total assets in each geographic segment through the following equation:

reserve value. In cases where neither segment assets nor a relevant industry-specific proxy is available, the percentage is calculated based on segment revenue.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

$$GEO_{LBM,i} = \sum_{r=1}^{n_i} w_{Asset,i,r} GSE_{LBM,r}$$

Where:

- $GSE_{LBM,r}$ is the Geographic Segment Exposure score of region r.
- $w_{Asset,i,r}$ is the weight of total assets in region r for company i.
- n_i is the number of geographic segments for company i.

For geographic segments reported as regions (example: Asia Pacific), a nominal GDP-weighted country or market aggregation is used to calculate region-level scores, using the following equation:

$$GSE_{LBM,r} = \sum_{c=1}^{n_r} w_{GDP,r,c} GSE_{LBM,c}$$

Where:

- $GSE_{LBM,c}$ is the Geographic Segment Exposure score of country or market c.
- $w_{GDP,r,c}$ is the specific weight of country or market c within region r.

Geographic Segment Exposure scores

The Geographic Segment Exposure score is determined by the Strikes and Lockouts score for a country or market.

$$GSE_{LBM,c} = SL_c$$

Where:

- SL_c is the Strikes and Lockouts score in country or market c.

The Strikes and Lockouts score for a country is calculated using the trailing 10-year average number of strikes and lockouts for a given country or market. The higher the number of strikes and lockouts, the higher the score, with the score varying from 0 to 10.

Company-Specific Exposure score

The Company-Specific Exposure score is determined by a simple average of the Total Employees score and the Layoffs Incidence score.

$$COM_{LBM,i} = Average\left(TE_{LBM,i} + LI_{LBM,i}\right)$$

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Where:

- $COM_{LBM,i}$ is the Company-Specific Exposure score of company i.
- $TE_{LBM,i}$ is the Total Employees score of company i .
- $LI_{LBM,i}$ is the Layoffs Incidence score of company i.

The Total Employees score is derived from the total number of employees of a company.

The Layoffs Incidence score for a given company is calculated from the number of layoffs in the last three years. A score of 10 is assessed if layoffs affect more than 10% of the company's workforce or more than 1,000 employees, otherwise the Layoffs Incidence Score is not assessed, and the Company-Specific Exposure score is determined solely based on the Total Employees score.

Data sources

The following sources are used to determine the Labor Management Exposure score:

International Labour Organization, Refinitiv, MSCI S&C, company disclosures.

All rights in the Information are reserved by MSCI and its Information Providers and user(s) shall not, nor assist others to, challenge or assert any rights in the Information.

Unless you contact MSCI and receive its prior written permission, you must NOT use the Information, directly or indirectly, in whole or in part (i) for commercial purposes, (ii) in a manner that competes with MSCI or impacts its ability to commercialize the Information or its services, (iii) to provide a service to a third party, (iv) to permit a third party to directly or indirectly access, use or resell the Information, (v) to redistribute or resell the Information in any form, (vi) to include the Information in any materials for public dissemination such as fund factsheets, market presentations, prospectuses, and investor information documents (e.g. KIIDs or KIDs), (vii) to create or as a component of any financial products, whether listed or traded over the counter or on a private placement basis or otherwise, (viii) to create any indexes, ratings or other data products, including in derivative works combined with other indexes or data or as a policy, product or performance benchmarks for active, passive or other financial products, (ix) to populate a database, or (x) to train, use as an input to, or otherwise in connection with any artificial intelligence, machine learning, large language models or similar technologies except as licensed and expressly authorized under MSCI's AI Contracting Supplement at https://www.msci.com/legal/supplemental-terms-for-client-use-of-artificial-intelligence.

The intellectual property rights of MSCI and its Information Providers may not be misappropriated or used in a competitive manner through the use of third-party data or financial products linked to the Information, including by using an MSCI index-linked future or option in a competing third-party index to provide an exposure to the underlying MSCI index or by using an MSCI index-linked ETF to create a financial product that provides an exposure to the underlying MSCI index without obtaining a license from MSCI.

The user or recipient of the Information assumes the entire risk of any use it may make, permit or cause to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, SUITABILITY, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION. Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall MSCI or any other Information Provider have any liability arising out of or relating to any of the Information, including for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages, even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited.

The Information, including index construction, ratings, historical data, or analysis, is not a prediction or guarantee of future performance, and must not be relied upon as such. Past performance is not indicative of future results. The Information may contain back tested data. Back-tested performance based on back-tested data is not actual performance but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy. The Information may include "Signals," defined as quantitative attributes or the product of methods or formulas that describe or are derived from calculations using historical data. Signals are inherently backward-looking because of their use of historical data, and they are inherently inaccurate, not intended to predict the future and must not be relied upon as such. The relevance, correlations and accuracy of Signals frequently change materially over time.

The Information may include data relating to indicative prices, evaluated pricing or other information based on estimates or evaluations (collectively, "Evaluations") that are not current and do not reflect real-time traded prices. No evaluation method, including those used by the Information Providers, may consistently generate evaluations or estimates that correspond to actual "traded" prices of any relevant securities or other assets. Evaluations are subject to change at any time without notice and without any duty to update or inform you, may not reflect prices at which actual transactions or collateral calls may occur or have occurred. The market price of securities, financial instruments, and other assets can be determined only if and when executed in the market. There may be no, or may not have been any, secondary trading market for the relevant securities, financial instruments or other assets. Private capital, equity, credit and other assets and their prices may be assessed infrequently, may not be priced on a secondary market, and shall not be relied upon as an explicit or implicit valuation of a particular instrument. Any reliance on fair value estimates and non-market inputs introduces potential biases and subjectivity. Internal Rate of Return metrics are not fully representative without full disclosure of fund cash flows, assumptions, and time horizons.

The Information does not constitute, and must not be relied upon as, investment advice, credit ratings, or proxy advisory or voting services. None of the Information Providers, their products or services, are fiduciaries or make any recommendation, endorsement, or approval of any investment decision or asset allocation. Likewise, the Information does not represent an offer to sell, a solicitation to buy, or an endorsement of any security, financial product, instrument, investment vehicle, or trading strategy, whether or not linked to or in any way based on any MSCI index, rating, subcomponent, or other Information (collectively, "Linked Investments").The Information should not be relied on and is not a substitute for the skill, judgment and experience of any user when making investment and other business decisions. MSCI is not responsible for any user's compliance with applicable laws and regulations. All Information is impersonal, not tailored to the needs of any person, entity or group of persons, not objectively verifiable in every respect, and may not be based on information that is important to any user.

It is not possible to invest in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI makes no assurance that any Linked Investments will accurately track index performance or provide positive investment returns. Index returns do not represent results of actual trading of investible assets/securities. MSCI maintains and calculates indexes but does not manage assets. The calculation of indexes and index returns may deviate from the stated methodology. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase securities underlying the index or Linked Investments. The imposition of these fees and charges would cause the performance of a Linked Investment to be different than the MSCI index performance.

Information provided by MSCI Solutions LLC and certain related entities ("MSCI Solutions"), including materials utilized in MSCI sustainability and climate products, have not been submitted to, nor received approval from any regulatory body. MSCI sustainability and climate offerings, research and data are produced by, and ratings are solely the opinion of MSCI Solutions. Other MSCI products and services may utilize information from MSCI Solutions, Barra LLC or other affiliates. More information can be found in the relevant methodologies on www.msci.com. MSCI Indexes are administered by MSCI Limited (UK) and MSCI Deutschland GmbH. No regulated use of any MSCI private real assets indexes in any jurisdiction is permitted without MSCI's express written authorization. The process for applying for MSCI's express written authorization can be found at: https://www.msci.com/index-regulation.

MSCI receives compensation in connection with licensing its indexes and other Information to third parties. MSCI Inc.'s revenue includes fees based on assets in Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of msci.com. Issuers mentioned in MSCI Solutions materials or their affiliates may purchase research or other products or services from one or more MSCI affiliates, manage financial products such as mutual funds or ETFs rated by MSCI Solutions or its affiliates or are based on MSCI Indexes. Constituents of MSCI equity indexes are listed
