Introduction

This document provides information on the components of the Ownership & Control Key Issue to enable users of ESG Ratings to understand how MSCI Sustainability & Climate's (MSCI S&C's)[1] outputs are determined. Ownership & Control is a Key Issue in the Governance Pillar of the MSCI ESG Ratings model. Companies are evaluated on their ownership structure, the proportionality between the economic exposure and voting power of the largest owner ("control skew"), and other capital or ownership factors that may affect governance risk.

Companies are also evaluated on investor protection, specifically the rights of shareholders and the effectiveness of the framework to hold boards to account, in addition to the regulatory and company-specific provisions that support (or restrict) shareholders' ability to determine the company's future.

For additional details on the MSCI ESG Ratings Model, refer to the Data, ratings and scores section of "ESG Ratings Methodology."

Ownership & Control Key Issue score

The Key Issue score is based on the aggregation of the following Key Metrics using the methodology described in the Calculating Governance Scores section of "ESG Ratings Methodology."

Each Key Metric evaluates a specific aspect of a company's governance risk profile.

Some Key Metrics are relevant only to companies with specific governance characteristics stemming from ownership type, management structure, or other factors. Companies are distinguished by the type of issuer, indicated by the scope of each Key Metric below.

Key Metrics

Category: Ownership structure

Controlling Shareholder Key Metric

Definition

Does any shareholder or shareholder bloc control more than 30% of the voting shares, or are they able to elect more than 50% of the company's board?

Flagged if yes.

Where the Governance Reference Entity is not an equity issuer, this evaluation is based on the ultimate owner.

Scope: All issuers

Typical scoring deduction: 0[2]

[2] This Key Metric adjusts the scoring for the following Key Metrics: Related-Party Transactions (if Controlling Shareholder Concerns is flagged and there are RPTs with the controlling shareholder); Board Majority Independent of Management; Board Majority Independent of

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Controlling Shareholder Concerns Key Metric

Definition

Does the company have ownership structures or governance arrangements that may present risks for minority public shareholders?

Flagged if yes.

This can be triggered by the presence of one or more criteria, including where:

- *Any of the following Key Metrics are also flagged:*
    - *No Independent Directors; Leadership Concerns; Undersized Board; Cross Shareholdings; or Poison Pill.*
- *Or any of the following apply:*
    - *The issuer has issued golden shares;*
    - *The issuer is controlled via a stock pyramid;*
    - *The issuer is incorporated as a Partnership Limited by Shares; or*
    - *The largest shareholder holds more than 75% of the total voting rights.*[3]

Scope: All issuers

Typical scoring deduction: 1.0

Dispersed Ownership Concerns Key Metric

Definition

Is the company so widely held that there are no principal shareholders or other large-bloc holders?

Flagged if yes.

This test eliminates family or founder firms, companies with a principal shareholder with more than 10% of voting rights, and companies where the aggregate 5%+ holdings exceed 30%.

This metric is intended to capture companies where there is a disconnect between ownership and management. In the absence of the constraining influence of an informed and involved bloc of

---

Other Interests; Significant Votes Against Directors. The following Key Metrics can only be flagged if a Controlling Shareholder is present: Controlling Shareholder Concerns; Cumulative Voting.

[3] All instances of "voting rights" used within this document refer to a particular company's outstanding voting rights, i.e., the aggregate votes attached to all issued shares, against which shareholder ownership thresholds are measured.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

shareholders, there is a greater risk of the CEO and board asserting a degree of power and authority more commonly associated with controlled companies.

Scope: All issuers

Typical scoring deduction: 0.2

Cross-Shareholdings Key Metric

Definition

Is the company involved in a series of cross-shareholdings with other (related or unrelated) companies?

Flagged if yes.

This metric identifies cross-shareholdings intended for non-investment purposes. Cross-shareholdings for the purpose of this Key Metric include direct, indirect (via subsidiary companies), circular, or more complex cross-shareholding networks.

Scope: All issuers

Typical scoring deduction: Variable, based on size of cross-shareholdings:

Range: 0.2 to 3.2

Tracking Stock Key Metric

Definition

Is the company being traded as a tracking stock or similar trading-based entity?

Flagged if yes.

Tracking stocks are treated as an indicator of potential governance weakness.

Scope: All issuers

Typical scoring deduction: 0.5

Variable Interest Entities Key Metric

Definition

Does at least 5% of the group's revenue come from VIEs where the company holds less than 10% voting rights?

Flagged if yes.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

A variable interest entity (VIE) is a special purpose vehicle in which the issuer holds a controlling interest in an operating company that is not based on a majority of the voting rights. Via structured contracts, the issuer is typically the primary beneficiary of the VIE.

Scope: All issuers

Typical scoring deduction: 0.5

Category: One share, one vote

Multiple Equity Classes with Different Voting Rights Key Metric

Definition

Has the company issued more than one class of equity shares and do these classes carry unequal voting rights?

Flagged if yes.

The inequality in the voting rights may be manifested via different votes per share, different votes per unit of nominal value, through the ability to vote only on certain matters, on the election of certain directors, or grant special rights (such as the exclusive right of nominating directors).

When a share class termed as "preference," "preferred," or similar, is classified in the annual accounts under accounting standards as an equity security rather than a liability, then it will be considered as an equity class for the purposes of this metric.

Share classes that do not carry special rights but have unequal voting rights may not be flagged if the number issued is not significant.

Scope: All issuers

Typical scoring deduction: Variable, based on size of voting rights differential & percentage of votes held by largest owner:

Range: 0.2 to 0.6

Single Equity Class with Different Voting Rights Key Metric

Definition

Does the capital structure include a single share class where the voting rights vary based on the duration of ownership (or extra voting rights are granted via "loyalty shares")?

Flagged if yes.

In some literature these may also be referred to as tenured voting shares.

Scope: All issuers

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Typical scoring deduction: Variable, based on length of required holding period and percentage of votes held by largest owner.

Range: 0.2 to 0.55

Voting Rights Limits Shares Held Key Metric

Definition

Are voting rights capped at a certain percentage, no matter how many shares the investor owns?

Flagged if yes.

This may refer to either an "ownership ceiling" or a "voting rights ceiling," in which ownership and/or voting rights limits are applied to some or all shareholders.

This metric is derived from a company's corporate charter and bylaws, or on the basis of applicable corporate regulations.

Scope: All issuers

Typical scoring deduction: Variable, based on ownership or voting-limit percentage.

Range: 0.1 to 0.3

Voting Rights Limits Residency Key Metric

Definition

Are voting rights different for foreign or non-resident shareholders?

Flagged if yes.

This provision sets limits on the ability of foreign or non-resident parties to vote on corporate matters, regardless of the number or type of shares held, and includes cases in which foreign shareholders are prohibited from voting. This may refer either to an aggregate limit on shares or voting rights held by shareholders of a stated nationality or to a limit on holdings of one shareholder based on that shareholder's nationality.

This metric is derived from a company's corporate charter and bylaws, or on the basis of applicable corporate regulations.

Scope: All issuers

Typical scoring deduction: Variable, based on ownership or voting-limit percentage.

Range: 0.15 to 0.3

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Government Intervention Concerns Key Metric

Definition

Do the company's capital and ownership structures include a "golden share" provision, are there equivalent provisions in national or state laws, or is there a government representative on the board?

Flagged if yes.

A "golden share" provision allows a single shareholder, usually a national government, to override all other shareholder voting rights on certain decisions.

Scope: All issuers

Typical scoring deduction: 0.5

Category: Control mechanisms

Poison Pill Key Metric

Definition

Has the company adopted a takeover defense such as a poison pill, shareholder rights plan, or equivalent provision?

Flagged if yes.

A takeover defense may shield management and the board from accountability (board entrenchment). Takeover defenses may include a formal shareholder's rights plan, poison pill, protective preference shares, or equivalent provision.

Scope: All issuers

Typical scoring deduction: 0.5

Category: Shareholder rights

Bylaws Amendments Key Metric

Definition

Does the board have the unilateral right to amend the company's bylaws/Articles of Association without shareholder approval?

Flagged if yes.

Most U.S. companies grant the board unilateral control over the bylaws, and are flagged accordingly, but in other regions this remains a helpful indicator of governance strength. This metric is derived from a company's corporate charter and bylaws, or on the basis of applicable corporate regulations.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Scope: Equity issuers

Typical scoring deduction: 0.1

Shareholder Rights to Convene Meeting Key Metric

Definition

Do shareholders lack the right to requisition an extraordinary general meeting (EGM) or does the threshold required to request an EGM exceed 10% of the voting rights?

Flagged if yes.

Some companies may apply a different threshold to append a resolution to the agenda of an existing meeting – see Shareholder Rights Concerns Key Metric.

Scope: Equity issuers

Typical scoring deduction: Variable, based on voting-rights threshold required to requisition a meeting.

Range: 0.1 to 0.3

Shareholder Rights Concerns Key Metric

Definition

Are shareholders limited in their ability to make changes at the company due to the nature of provisions in the governing documents?

Flagged if yes.

Does a change to the governing documents require a vote in favor of more than 67% of the total capital or more than 75% of the votes cast? Are shareholders both unable to act by written consent in a majority vote AND does the threshold required to request inclusion of a shareholder proposal at the annual general meeting (AGM) exceed 1% (or is not permitted)?

Scope: Equity issuers

Typical scoring deduction: 0.2

Say-on-Pay Policy Key Metric

Definition

Has the company failed to implement regular say-on-pay votes?

Flagged if yes.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Shareholders should be granted a vote on either the policies themselves, the amounts paid pursuant to these policies, or on the report of the pay committee that sets out these items(i.e., this should be a broad-based vote on policy or total pay, and not just a vote on the policy or total amount of one component of pay). The scope of the say-on-pay vote must include any executive directors on the board of directors, or the most senior executive, if there is no executive director on the board. The vote may be in respect of all the executive directors collectively or by separate votes for each executive director individually. Votes should be held on a regular basis, at intervals of no more than three years.

The Key Metric will not be flagged if there are no executives (e.g., for investment trusts).

Scope: Equity issuers

Typical scoring deduction: 0.1

Confidential Voting Key Metric

Definition

Has the company failed to implement confidential voting, barring reasonable exceptions?

Flagged if yes.

Confidential voting is intended to protect the anonymity of shareholders who wish to vote against management, or against a particular director, but who may be concerned about the possibility of redress. This metric is derived from a company's corporate charter and bylaws, or on the basis of applicable corporate regulations.

For the U.S. and Canada, this metric is flagged unless the required evidence is identified to confirm confidential voting is in place. For other markets, this metric is only flagged if specific evidence is identified to indicate the absence of confidential voting.

Scope: Equity issuers

Typical scoring deduction: 0.1

Category: Director elections

Proxy Access Key Metric

Definition

Does the company not allow qualified shareholders to nominate directors for election at the annual general meeting, such nominees to be included in the meeting agenda circulated by the company to its shareholders?

Flagged if yes.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Proxy access is a measure of shareholder's ability to influence the composition of the company's board. This metric is derived from a company's corporate charter and bylaws, or on the basis of applicable corporate regulations.

Scope: Equity issuers

Typical scoring deduction: 0.2

Annual Director Elections Key Metric

Definition

Do any shareholder-elected directors stand for re-election at intervals greater than one year?

Flagged if yes.

This metric captures both classified boards, where director re-election is staggered, and boards where all directors stand simultaneously for re-election albeit less often than annually. Boards undergoing declassification over an extended period are treated as classified until this process has been completed (i.e., until all the board members are re-elected annually). The metric does not refer to employee-appointed directors, only those elected by shareholders.

Scope: Equity issuers

Typical scoring deduction: Variable, based on percentage of board subject to re-election and frequency of re-election:

Range: 0.1 to 0.2

Strong Classified Board Combination Key Metric

Definition

Does the company have a classified or staggered board, in combination with other limitations on shareholder rights that further limit shareholders ability to affect the make-up of the board?

Flagged if yes.

A company has a strong classified board combination if, in addition to having a Classified Board, any of the following are true:

- *Director Removal for Cause Only is Yes, and Shareholder Can Fill Board Vacancies is No and the Bylaw Vote Percent is = 0% or > 51%;*
- *Director Removal for Cause Only is Yes, and Shareholder Can Fill Board Vacancies is No and the Effective Classified Board is Yes;*
- *Director Removal without Cause Vote % > 51%, and Shareholder Can Fill Board Vacancies is No and Bylaw Vote Percent is = 0% or > 51%; or*

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

- *Director Removal Without Cause Vote % > 51%, and Shareholder Can Fill Board Vacancies is No, and Effective Classified Board is Yes.*

Scope: Equity issuers

Typical scoring deduction: 0.2

Majority Voting Key Metric

Definition

Has the company failed to use or adopt binding majority voting in the election of directors (with immediate resignation, if the director does not receive a majority of the votes cast)?

Flagged if yes.

MSCI S&C uses a strict majority standard for this metric, flagging plurality, plurality plus resignation, and majority plus resignation standards. Where a director fails to achieve a majority of the votes cast, this standard requires the director to immediately depart (unless the company would have below the legal minimum number of directors, in which case they remain only briefly pending a new appointment). Implementation of majority voting is a measure of the shareholder's ability to influence the composition of the board.

Scope: Equity issuers

Typical scoring deduction: Variable, based on voting standard and whether director vote is binding.

Range: 0.1 to 0.3

Cumulative Voting Key Metric

Definition

Does the company, which has a controlling shareholder, use a plurality vote standard for director elections, without permitting cumulative voting (whether as the default election standard or at the request of shareholders)?

Flagged if yes.

Cumulative voting is a method of election of the board of directors whereby a stockholder may cast as many votes for directors as he or she has shares of stock, multiplied by the number of directors to be elected. The purpose of cumulative voting is to facilitate the representation of minority stockholders on the board. The stockholder may cast all his or her votes for one or more, but not all, directors on the ballot, which therefore promotes representation of small shareholders.

Scope: Equity issuers

Typical scoring deduction: 0.1

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Director Removal Without Cause Key Metric

Definition

Do shareholders lack the right to remove individual directors without cause?

Flagged if yes.

If director removal without cause is permitted, a bidder that is hostile to current management may seek to remove existing directors and replace them with the bidder's nominees.

Where there is no evidence of this right, from either national or stock exchange regulation or from the company's documents, the Key Metric will be flagged.

Scope: Equity issuers

Typical scoring deduction: 0.1

Category: Takeover provisions

Constituency Provision Key Metric

Definition

Does the company have a constituency provision or is it subject to constituency protection under applicable law?

Flagged if yes.

Constituency provisions allow a board to consider interests other than those of shareholders in making corporate decisions, including decisions about changes of control. Typical other constituencies would include employees, communities, customers, suppliers and the environment.

The Key Metric will be flagged where there is explicit evidence of this provision from either national or stock exchange regulation or from the company's constitutional documents.

Scope: Equity issuers

Typical scoring deduction: 0.1

Business Combination Provision Key Metric

Definition

Does the company have a business combination provision in place or is it subject to business combination protection under applicable law?

Flagged if yes.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

A business combination provision requires that a company not engage in a transaction with a shareholder holding a certain percentage (usually dubbed an "interested shareholder") for a period of time after the shareholder exceeded this threshold, or that such a transaction be approved by a higher-than-usual percentage of shares. A different variation of a "business combination" may also list a higher-than-usual percentage of shares for approving a merger but not list a time period during which a merger would be prohibited.

Scope: Equity issuers

Typical scoring deduction: 0.1

Fair Bid Treatment Provisions Key Metric

Definition

Does the company not have a fair price provision (with a mandatory bid requirement which does not exceed 33.3%) in place or is it not subject to fair price protection under applicable law?

Flagged if yes.

These terms generally involve all shareholders being entitled to receive the same price for their shares, the price being within some range of the average market price over some period of time prior to the offer, the offer remaining open for a minimum amount of time, and similar protections. In the U.S., this is generally presented as an exception to the business combination provision's prohibition or higher vote requirement that applies when an acquisition offer contains certain terms designed to ensure fairness and eliminate the possibility that shareholders will feel coerced to agree to the offer.

Scope: Equity issuers

Typical scoring deduction: 0.1

Ownership Structure Assessment

The ownership structure of a company is evaluated along three axes.

The first dimension of ownership assessment is the level of control asserted by the largest owner. Principal-agent concerns are primarily applicable to widely held companies with highly dispersed ownership. For closely held companies, however, governance risk is primarily a function of the identity and degree of control wielded by a company's dominant shareholder. Where stock pyramids are present or in the case of private companies, our assessment focuses on the ultimate owner.

Exhibit 22: Largest Owner Classification

Classification	Description

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

Controlling	Largest shareholder or shareholder group holds 30% or more of the voting rights.
Principal	Largest shareholder or shareholder group holds 10% or more, but less than 30% of the voting rights.
Widely Held	No shareholder or shareholder group holds more than 10% of the voting rights.

The second dimension of the ownership assessment focuses on the background and motivations of the dominant owner, which might be a company founder or family descendants, state or corporate owner.

Exhibit 33: Key Owner Types

Classification	Description
Founder	The founder/s of the company play an active role in the company – e.g., serves as chair and/or CEO, is a director or senior executive, or is a current shareholder (regardless of the size of their shareholding).
Family	Family holds **10% or more** of the voting rights and maintains at least one board seat.
State	State directly or indirectly controls **10% or more** of the voting rights.[4] The state identified in the Country of Classification of the issuer must match the state owning the shares.
Corporate Parent	The issuer is controlled by a corporate entity — listed or unlisted — holding 30% or more of its voting rights.

The third dimension evaluates whether control skew is present, i.e., where the voting power of the largest owner is misaligned with its entitlement to cash flows (see Exhibit 4), which may adjust the governance risk profile.

Exhibit 44: Control Skew

Classification	Description
Stock Pyramid	Control is exercised through a chain of controlled companies – each of which is also typically listed – that ultimately results in a shareholder gaining voting power that is misaligned with its economic interest. Such a structure allows the top-level shareholder to exercise control (holding at least 30% of the total

[4] Where a shareholding is not directly held by the state, the intent behind the holding is reviewed. A holding by a government holding company for strategic investments will generally result in a state ownership classification, whereas holding by a pension plan for government employees that is managed by independent trustees will not.

© 2026 MSCI Inc. All rights reserved. Please refer to the disclaimer at the end of this document.

	voting rights) through each level of the pyramid, and to maintain control of the issuer despite having a relatively small entitlement to cash flows.
Control Group Includes Cross-Shareholding	The cross-shareholding is held by parties related to a controlling shareholder group to maintain effective voting control, such as a holding by another listed entity with common control. Cross-shareholdings are where two or more entities hold at least 0.5% of shares in each other, or via a circular or more complex cross-shareholding arrangement.
Multiple Equity Classes with Unequal Voting Rights	Multiple equity classes with unequal voting rights typically fall into the following main types: • Different votes per share;[5] • Different votes per unit of nominal value; and • Different class rights in the election of directors or other special rights.
Single Equity Class with Unequal Voting Rights	Tenured voting shares (sometimes referred to as "loyalty shares") are a provision that allows shareholders who have held shares throughout a qualifying holding period to acquire additional voting rights at the end of that period. The additional voting rights are available until the qualifying shares are sold. These provisions fall into two main types: • Additional voting rights apply within a single equity class; and • The use of separate "loyalty share" class without economic interest.

[5] Share classes that account for less than 5% of both the total votes and total capital are excluded from our analysis.

The intellectual property rights of MSCI and its Information Providers may not be misappropriated or used in a competitive manner through the use of third-party data or financial products linked to the Information, including by using an MSCI index-linked future or option in a competing third-party index to provide an exposure to the underlying MSCI index or by using an MSCI index-linked ETF to create a financial product that provides an exposure to the underlying MSCI index without obtaining a license from MSCI.

The user or recipient of the Information assumes the entire risk of any use it may make, permit or cause to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, SUITABILITY, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION. Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall MSCI or any other Information Provider have any liability arising out of or relating to any of the Information, including for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages, even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited.

The Information, including index construction, ratings, historical data, or analysis, is not a prediction or guarantee of future performance, and must not be relied upon as such. Past performance is not indicative of future results. The Information may contain back tested data. Back-tested performance based on back-tested data is not actual performance but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy. The Information may include "Signals," defined as quantitative attributes or the product of methods or formulas that describe or are derived from calculations using historical data. Signals are inherently backward-looking because of their use of historical data, and they are inherently inaccurate, not intended to predict the future and must not be relied upon as such. The relevance, correlations and accuracy of Signals frequently change materially over time.

The Information may include data relating to indicative prices, evaluated pricing or other information based on estimates or evaluations (collectively, "Evaluations") that are not current and do not reflect real-time traded prices. No evaluation method, including those used by the Information Providers, may consistently generate evaluations or estimates that correspond to actual "traded" prices of any relevant securities or other assets. Evaluations are subject to change at any time without notice and without any duty to update or inform you, may not reflect prices at which actual transactions or collateral calls may occur or have occurred. The market price of securities, financial instruments, and other assets can be determined only if and when executed in the market. There may be no, or may not have been any, secondary trading market for the relevant securities, financial instruments or other assets. Private capital, equity, credit and other assets and their prices may be assessed infrequently, may not be priced on a secondary market, and shall not be relied upon as an explicit or implicit valuation of a particular instrument. Any reliance on fair value estimates and non-market inputs introduces potential biases and subjectivity. Internal Rate of Return metrics are not fully representative without full disclosure of fund cash flows, assumptions, and time horizons.

The Information does not constitute, and must not be relied upon as, investment advice, credit ratings, or proxy advisory or voting services. None of the Information Providers, their products or services, are fiduciaries or make any recommendation, endorsement, or approval of any investment decision or asset allocation. Likewise, the Information does not represent an offer to sell, a solicitation to buy, or an endorsement of any security, financial product, instrument, investment vehicle, or trading strategy, whether or not linked to or in any way based on any MSCI index, rating, subcomponent, or other Information (collectively, "Linked Investments").The Information should not be relied on and is not a substitute for the skill, judgment and experience of any user when making investment and other business decisions. MSCI is not responsible for any user's compliance with applicable laws and regulations. All Information is impersonal, not tailored to the needs of any person, entity or group of persons, not objectively verifiable in every respect, and may not be based on information that is important to any user.

It is not possible to invest in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI makes no assurance that any Linked Investments will accurately track index performance or provide positive investment returns. Index returns do not represent results of actual trading of investible assets/securities. MSCI maintains and calculates indexes but does not manage assets. The calculation of indexes and index returns may deviate from the stated methodology. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase securities underlying the index or Linked Investments. The imposition of these fees and charges would cause the performance of a Linked Investment to be different than the MSCI index performance.

Information provided by MSCI Solutions LLC and certain related entities ("MSCI Solutions"), including materials utilized in MSCI sustainability and climate products, have not been submitted to, nor received approval from any regulatory body. MSCI sustainability and climate offerings, research and data are produced by, and ratings are solely the opinion of MSCI Solutions. Other MSCI products and services may utilize information from MSCI Solutions, Barra LLC or other affiliates. More information can be found in the relevant methodologies on www.msci.com. MSCI Indexes are administered by MSCI Limited (UK) and MSCI Deutschland GmbH. No regulated use of any MSCI private real assets indexes in any jurisdiction is permitted without MSCI's express written authorization. The process for applying for MSCI's express written authorization can be found at: https://www.msci.com/index-regulation.

MSCI receives compensation in connection with licensing its indexes and other Information to third parties. MSCI Inc.'s revenue includes fees based on assets in Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of msci.com. Issuers mentioned in MSCI Solutions materials or their affiliates may purchase research or other products or services from one or more MSCI affiliates, manage financial products such as mutual funds or ETFs rated by MSCI Solutions or its affiliates or are based on MSCI Indexes. Constituents of MSCI equity indexes are listed
